Dear Learner,

in this **XXL Glossary** you will find, as its title suggests, much more than just a glossary. Each chapter includes the following sections:

Vocabulary

All new words are presented in the order in which they appear in both the course book and the work-book, page-by-page, then alphabetically. Unlike a dictionary, this glossary allows you to learn words in context so that their meaning is far more real to you than a dictionary entry.

Forms and Structures

In this section, we explain grammar based on concrete examples from the course book and compare and contrast the structures with those of English. As the course proceeds, you will find continued reference in newer sections to material in previous chapters to help reinforce your understanding and mastery of these points.

The “**Communication Strategies**” go a step beyond grammar to help acclimate you to aspects of the spoken language that you will encounter. This subsection reviews things that one hears that can’t be found in the dictionary.

We have also included additional translation **exercises** in each chapter to help you get a better sense of your progress and mastery, allowing you to see more how German and English are similar and different.

Listening and Speaking

As important as grammar, structure, and vocabulary are, without knowing the sound system, they are of no use. In this section, we aim to give you the tools you will need not only to recognize the sounds of German, but to reproduce them so that you can be understood, even when your structural knowledge is weak.

Getting It All Down

In this section, we provide numerous suggestions for helping you to learn German more effectively. As the program progresses, you will find some methods that work for you, perhaps some that do not, but you will add to your arsenal of study strategies. We place particular emphasis on the use of a *Lerntagebuch* (study journal) throughout.

Familiarity and Understanding

No language exists apart from the culture in which it is couched. Here you will learn about the German-speaking areas of the world, their literature and arts, and aspects of daily life. This section also aspires to help you avoid common missteps that many foreigners and learners make.

Self-Evaluation

At the end of each chapter, you have the opportunity to evaluate your progress on the objectives in each unit, allowing you to give extra attention and/or seek extra help in areas where you are not as confident in your new skills.

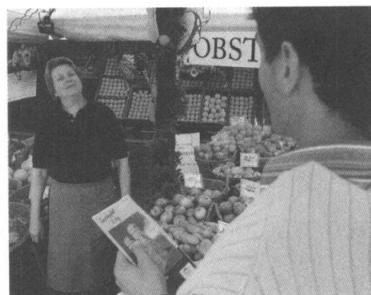

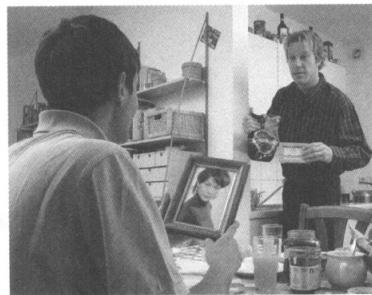

We hope that you find this volume helps you learn German with greater ease and more enjoyment, and we wish you every success.

Sincerely,

the authors and editors

1 Statements (*Aussagen*)

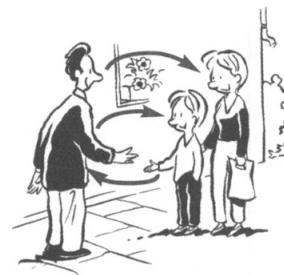

examples	<i>Mein Name</i>	<i>ist</i>	<i>Andreas Zilinski.</i>	My name is Andreas Zilinski.
	<i>Ich</i>	<i>bin</i>	<i>Michaela Hueber.</i>	I am Michaela Hueber.
	<i>Ich</i>	<i>spreche</i>	<i>Deutsch.</i>	I speak German.

1 2
subject verb

In German, a complete sentence must always have two elements: a subject and a predicate.

The sentence subject is represented by one word or various words, such as a noun and its complements (*mein Name*) or by a pronoun (*ich*).

In both of these aspects, German and English are alike. They differ, however, in that German does not always require that the subject come before the verb. In a German sentence, the conjugated verb is always the second element. If something such as an adverb comes at the beginning (the first element), then there is no comma separating it from the rest of the sentence; instead, the verb just comes second and the subject follows it.

2 Questions with an interrogative (*W-Fragen*) I

examples	<i>Wer</i>	<i>sagt</i>	<i>das?</i>	Who's saying that? Who says that?
	<i>Wer</i>	<i>bist</i>	<i>du?</i>	Who are you?
	<i>Wie</i>	<i>heißen</i>	<i>Sie?</i>	What is your name?
	<i>Wie</i>	<i>ist</i>	<i>Ihr Name?</i>	(literally: how are you called?)
	<i>Was</i>	<i>sprechen</i>	<i>Sie?</i>	What (language) do you speak?
	<i>Woher</i>	<i>kommen</i>	<i>Sie?</i>	Where do you come from?

1 2 3
interrogative verb subject

As opposed to a question that can be answered with “yes” or “no”, sometimes called a closed question, a question with an interrogative (question word) at the beginning is open-ended and seeks more specific information. All interrogatives in German begin with a *W*, hence the name *W-Frage*.

In such questions, the interrogative is in the first position, the verb is in the second position and the subject follows the verb.

In the examples above, you can see how the different elements fit together:

- *Wer?* asks about a person.
- *Wie?* asks for a qualitative description. Though it translates as “how” in English, its meaning also extends in German to many situations where English speakers use “what”.
- *Was?* asks about activities, circumstances, and objects.
- *Woher?* asks about the point of origin, where from. The English equivalent of this word, now archaic, is “whence”.

Forms and Structures

3

The Preposition of Location *aus* (*Lokalpräposition*)

examples

Woher kommen Sie?

- *(Ich komme) aus England/aus Illinois/aus Sydney.*
- *Aus dem Libanon/aus dem Mittelwesten.*
- *Aus der Schweiz/aus der Türkei.*
- *Aus den USA.*

When answering a *woher?* question, German uses the preposition *aus* + the name of the location. Just as *woher* asks where from, the preposition *aus* cannot be left out of the answer. As in English, some proper geographical names have articles (such as “the Bahamas”), though there is no direct correspondence between which English names use an article and which German ones do. The German places requiring an article must be learned as fixed expressions.

4

Personal Pronouns (*Personalpronomen*) I

examples

1st person: *Ich spreche Türkisch.*
I speak Turkish.

2nd person: *Entschuldigung, woher kommst du?* *Entschuldigung, wie heißen Sie?*
Excuse me, where do you come from? Excuse me, where do you come from?

As with all European languages and in contrast to English, German has two distinct forms of address when talking to someone else, the familiar form (*du*) and the formal form (*Sie*). The formal form of address is always capitalized. For more information on when *du* and *Sie* are used, as well as on the verb *heißen*, please see “Familiarity and Understanding” on p. 17–18.

5

Verb Conjugation (*Verb: Konjugation*) I

examples

Ich heiße Jordi.
Woher kommst du?
Sprichst du Deutsch?

infinitive			<i>komm-en</i>	<i>arbeit-en</i>	<i>heiß-en</i>	<i>sprech-en</i>	
singular	1 st	<i>ich</i>	<i>komme</i>	<i>arbeite</i>	<i>heiße</i>	<i>spreche</i>	<i>-e</i>
	2 nd	<i>du</i>	<i>kommst</i>	<i>arbeitest</i>	<i>heißt</i>	<i>sprichst</i>	<i>-st</i>
	formal	<i>Sie</i>	<i>kommen</i>	<i>arbeiten</i>	<i>heißen</i>	<i>sprechen</i> verb with vowel change	<i>-en</i>

German verbs have only one conjugation in the present tense (unlike English, which has three: I come, I am coming, I do come). German verbs conjugate to match their subjects by adding the corresponding ending to the verb stem. Infinitives always end in *-en* or *-n*. The endings for the *ich-*, *du-* and *Sie-forms* are visible above. There are a couple of spelling rules you should remember:

- If the verb stem (infinitive minus the *-en* or *-n*) ends in *s*, *ß*, *x* or *z*, drop the *-s* at the end of the second person familiar form and use instead of *-st* only *-t* (i.e. *heißen* – *du heißtt*).
- If the verb stem ends in *-d* or *-t*, most of the time, you will add an *-e* before the *-st* on the *du*-form (i.e. *arbeiten* – *du arbeitest*),
- Some verbs change their vowels in the 2nd person (i.e. *sprechen* – *du sprichst*), and
- a very small group of verbs conjugates irregularly, one of which is *sein*. (see below)

infinitive		<i>sein</i>	
singular	1 st	<i>ich</i>	<i>bin</i>
	2 nd	<i>du</i>	<i>bist</i>
formal		<i>Sie</i>	<i>sind</i>

6 Communication Strategies

a Dialogue Particles (*Dialogpartikeln*)

Dialogue particles indicate agreement, acceptance, approval, doubts or reservations, and so on. They also serve to structure, manage or end a discussion. Depending on the context in which they appear, they can have very distinct meanings:

examples *Entschuldigung, wie ist Ihr Name?*
Khosa.
Ah ja, Herr Khosa.

Excuse me, what's your name?
Khosa.
Oh yes, Mr. Khosa.

Ah ja indicates that the speaker hears and remembers something already known.

example *Ist Frau Söll da, bitte?*

Is Ms. Söll there?

The use of *bitte* is effectively obligatory in any case where the speaker needs the assistance of the person being spoken to, such as here, where the speaker is seeking information.

examples *Frau Söll ist nicht da.*
Ja, gut. Danke.

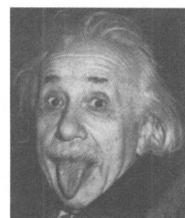

Ms. Söll is not here.
Very well. Thank you.

With *ja, gut* one expresses conformity. It also serves to indicate that the speaker wishes to end the conversation or the current topic of conversation.

examples *Wer ist das?*
Das ist Albert Einstein.
Ja, stimmt.

Who is that?
That's Albert Einstein.
Yeah, that's right.

With *ja, stimmt* one confirms the earlier statement.

b Modal Words (*Modalpartikeln*)

Modal words express the speaker's emotional attitude to the situation or the content of the statement, question or imperative. These words cannot be literally translated; in English, we tend to change our intonation in a spoken statement, or we reformulate the entire sentence to achieve the same effect. Since a modal word can have different effects upon a statement depending on the overall context, it is best to consider context when encountering them, and to avoid the temptation to try to find an equivalent in your own language.

Forms and Structures/Exercises

Unlike dialogue particles, modal words (which are also called *Partikeln* in German) are never stressed in speaking. They tend to come immediately after the verb, just like the negation *nicht*.

example *Du sprichst aber gut Deutsch!*

You really speak good German!

aber as a modal word appears in exclamatory statements and indicates affirmation of something that one really did not expect or believe before, such as a pleasant surprise. It is not to be confused with the conjunction *aber* which does have a concrete meaning, but appears usually at the beginning of a clause.

7 Translate into English:

- a Ist Herr Thoma da, bitte? ?
- Tut mir leid, Herr Thoma ist nicht da.
- b Woher kommt Richard? Aus Kalifornien? ?
- Ja, stimmt.
- c Das ist meine Kollegin Lucie. ?
- Ah ja. Hallo, Lucie.

8 Translate into German:

- a Hi, I'm David.
- b Hello, I'm Steve Fisher.
- c Good afternoon, my name is Delgado,
Rosa Delgado.

9 Translate into German:

- a Excuse me, what's your name?
– Abramov, Julie Abramov. ?
- b Where are you from?
– I'm from Iowa, from the Midwest. ?
- c And you, Joan, where are you from?
– From Minnesota, from St. Paul. ?
- d What languages do you speak?
– English, French and a little Spanish. ?

Listening and Pronunciation

It is important to learn not just the sounds of German, but how they differ from those of English. One fundamental difference is the vowels: in English, our short and long vowels can be completely different sounds (such as the short a in “apple” and the long a in “ape”). This is not so in German.

Long and Short Vowels

German and English share 5 vowels that look the same when written, but the sounds are different, and it is actually easier to tell in German when a vowel is short and when long.

A vowel is long when

- it is doubled (*Meer, Beethoven*)
- it is followed by an <h> in the same syllable (*Zahl, zehn*) or an <ß> (*Straße*)
- it is alone at the end of a syllable (*so*) or followed by a single consonant and then the next syllable (*Name*).
- <i> is long if followed by an <e> (*Sie*).

In contrast, short vowels are followed by more than one consonant (*kommen*).

The only real difference in pronunciation between long and short vowels is the length of the vowel: a long vowel is spoken longer than a short vowel, and short vowels are quickly cut off.

The Alphabet and its Pronunciation

The German alphabet looks just like the English, with the addition of four characters. Unlike English, however, the letters’ sounds remain consistent and once you know the alphabet, you have almost the entire sound system mastered.

It is very important that letters be spoken at the front of the mouth, formed more with the lips and tongue than in English, particularly more so than American English. Although German has a reputation of being guttural, English is actually far more so.

<a>	a	[a:]	Abend; Tag; Ah	<r>	err	[ɛR]	Herr
	be	[be:]	Abend	<s>	ess	[ɛS]	ist[s], Sie [z]

							Tschüs
							see next page

Listening and Pronunciation

The Consonants <v> and <w>

In German, the <w> is always pronounced as our <v>, except in a few words borrowed from English. Likewise, the German <v> is always pronounced as our <f> except for foreign words, usually coming from French or Latin like *Vase*.

The Consonant <q>

The German <q> is almost always followed by a <u>, except in foreign words. Words with the <qp> in German are foreign themselves most of the time. The sound of <qu> is like an English <kv> as in “kvetch”, which actually came into Yiddish from German.

The Consonants <s> and <z>

The German <s> at the beginning of a word or syllable sounds like our <z>; it is voiced. As the final sound in a syllable or word (*ist, tschüss*) it loses its voice and becomes voiceless like our <s>. <z> on the other hand is always explosive; the air stops before the the voiceless consonant comes out. It is similar to the “zz” in “pizza” or the “ts” in “hits.”

The Consonant <ß>

The German <ß> is always pronounced like our <ss>. It functions as a double s after long vowels (*Straße*) and diphthongs (*heissen*). When writing on a keyboard that does not have international characters, it can be substituted with “ss”.

The Umlauted Vowels <ä>, <ö>, <ü>

The two dots over these vowels signify that the vowel is being raised inside the mouth. We have a similar phenomenon in English, when the plural of “man” becomes “men”. For more specifics on how to pronounce umlauts, see Chapter 5 of this volume.

Syllabic Stress

Guten • kommen • Hauptbahnhof

Most German words are stressed on the first syllable, unless they begin with one of the prefixes *be-, ent-, er-, ge-, ver-, zer-*: *Gespräch* • *Entschuldigung*

Words that have come to German from foreign languages do not show this tendency:
Visitenkarte • *Information*.

Stress in Short Statements

Guten Tag. *Guten Morgen,* *Frau Schröder.*

In short statements, the final word gets the most emphasis as it tends to be the one with the most communicative importance.

Diphthongs

There are three German diphthongs, two of which have multiple spellings:

<ei>/<ai>/<ey> [âɪ]	<i>mein/Kaiser</i>	English: eye; bye
<au> [âʊ]	<i>Haus</i>	English: house, brown
<eu>/<äu> [ɔɪ]	<i>Deutsch/Häuser</i>	English: boy, koi

Intonation

Entschuldigung. ↘
Ich heiße Eva Baumann. ↘

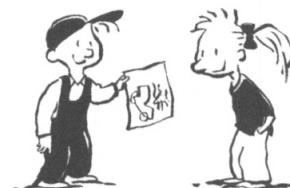

The intonation of a sentence indicates its conclusion and as such goes downward at the end of the sentence. (↘)

Getting It All Down

Learning how to learn a language efficiently is not just a matter of memorizing vocabulary and grammar. Familiarizing yourself with learning strategies and trying them out may seem like an inordinately large investment of time and energy, but once activities become part of your study routine, it can greatly accelerate and enhance your learning experience. Not every suggestion works for everyone, but most people find many of them helpful.

One of the best habits to acquire is to contextualize vocabulary as you learn it. Language is not mathematics, and sentences don't work like arithmetic. As helpful as bilingual dictionaries and glossaries are, they only do part of the job. Throughout the vocabulary list in this volume, for example, wherever the word "here" is noted, you can see that the same word can have very different meanings depending upon the context. Similarly, it is impossible to translate between languages word-for-word and retain any real meaning. For example, the phrase "*Wie geht es Ihnen?*" means "How are you?" but there is no one-to-one correlation: no one would ever say "How walks it to you?" – a literal translation – and expect to be understood.

Two ways, then, to approach vocabulary are to group items together thematically so that the associations with other words strengthen the identification of each one, and to learn words in situations where you have been exposed to them, such as phrases or sentences from the text, in ads you see on the internet or in magazines, or expressions you hear. These situations can be noted on vocabulary cards as you make them for your own review.

You might have noticed that verb conjugation was presented here in tabular form. Only three forms have been covered so far, but more will follow in the units ahead, and you will be able to add onto that table at that time. A useful strategy is to create your own tables to chart patterns that you find, and it is always good to look for patterns within structures. Your tables should reflect the spatial manner in which you understand them, whether vertical or horizontal, in different colors or fonts, whatever resonates with you.

Familiarity and Understanding

Familiarity and Understanding

Learning another language means learning about the culture in which that language is based, finding similarities and differences with your own. In this section, we hope to provide you with an introduction to cultural norms and differences that will, hopefully, allow you to avoid gross misunderstandings.

The Verb *heißen*

Very much unlike English, German has two ways of saying what someone's name is, either to say "his/her/my name is ..." or "I am/he or she is called ...". This latter case in German involves the verb *heißen*. As you will note below in "Making Introductions," there is effectively no difference in the translation of *Ich heiße ...* and *Mein Name ist ...* as they both mean essentially the same thing. What is important to note is that it is far more common when meeting someone to ask "*Wie heißen Sie?*" or "*Wie heißt du?*" than it is to ask "*Wie ist Ihr Name?*" which sounds more official. *heißen* is equivalent to the French *s'appeler*, the Spanish *llamarse*, or the Italian *chiamarsi*.

Making Introductions

Shaking hands in greeting is common practice in formal situations, less so among friends and family. Hugs or kisses on the cheeks are reserved for very close relationships.

examples

- Ich bin Jelena Savic.*
- Ich heiße Maria Zell.*
- Mein Name ist Otto Castell.*
- Mein Name ist Larry.*

- I am
- May name is (I am called) ...
- My name is ...
- My name is ...

One can also give just the surname. This is common in professional situations: *Zell*, *Castell*, ...

The titles *Frau* and *Herr* are not used while introducing oneself, neither with the verb *sein* nor with the verb *heißen*.

Ich heiße Frau Savic. / *Ich bin Herr Castell.*

Among friends, groups of acquaintances, in family settings:

examples

- Ich bin Erik.*
- Ich heiße Jean Claude.*

- I am ...
- My name is (I am called) ...

In more familiar situations, avoid using the phrase *Mein Name ist ...*.

When asking for someone else's name, it is better to err on the side of caution and speak with the formal:

- examples** *Wie heißen Sie?*
Wie ist Ihr Name?
- What is your name? (How are you called?)
 What is your name?

Between young people, or when addressing a child:

- examples** *Wie heißt du?*
Wer bist du?
- What is your name? (How are you called?)
 Who are you?

To introduce someone else:

- examples** *Das ist Frau Terrero.*
Das ist (die) Jana/(der) Peter.
- This is Ms. ...
 This is (the) Jana/(the) Peter..

Whether an article is attached to a first name of a friend who is introduced to someone else depends on the region the speaker comes from. In southern Germany the article is common, in the North it is not. And it is never attached to a last name.

Du or Sie?

When in doubt, err on the side of caution and use *Sie*. A native speaker will tell you when to use *du*. In general, *Sie* is always used in business, work and professional situations until such time as individuals decide to use *du*. Young people always use *du* with each other, and adults addressing younger children use *du*. Friends, family members, and God are addressed as *du*. Adults tend to use *Sie* with each other until a relationship becomes more familiar with time and circumstance.

Expressing Gratitude

Danke or *Vielen Dank* are expressions of thanks. Generally, they are used frequently.

A Bit about bitte

The word “*bitte*” in German means both “please” when asking for something and “you’re welcome” after an expression of gratitude. It is also used when presenting something, such as “here you are” or “here you go”. It can also be used to ask someone to repeat something you did not hear the first time, either by itself or as part of “*Wie bitte?*” Finally, “*ja, bitte*” or “*bitte schön*” is used to open a dialogue between a functionary and a customer, such as summoning the next person in line at the post office. Context will tell you which sense is appropriate.

Greetings and Farewells

Until 10 or 11 a.m., the greeting *Guten Morgen* or the short form *Morgen!* is used. After that up till about 6 p.m. one says *Guten Tag* or *Tag!* In southern Germany and in Austria, *Grüß Gott* (God greets you) is heavily used, and in Switzerland, its Swiss equivalent *Grüezi*, is used during the day.

After 6 p.m., *Guten Abend* or *N' Abend!* (colloquial) is common.

Only when leaving for the evening or going to bed are *Gute Nacht!* or *Nacht!* appropriate.

Familiarity and Understanding

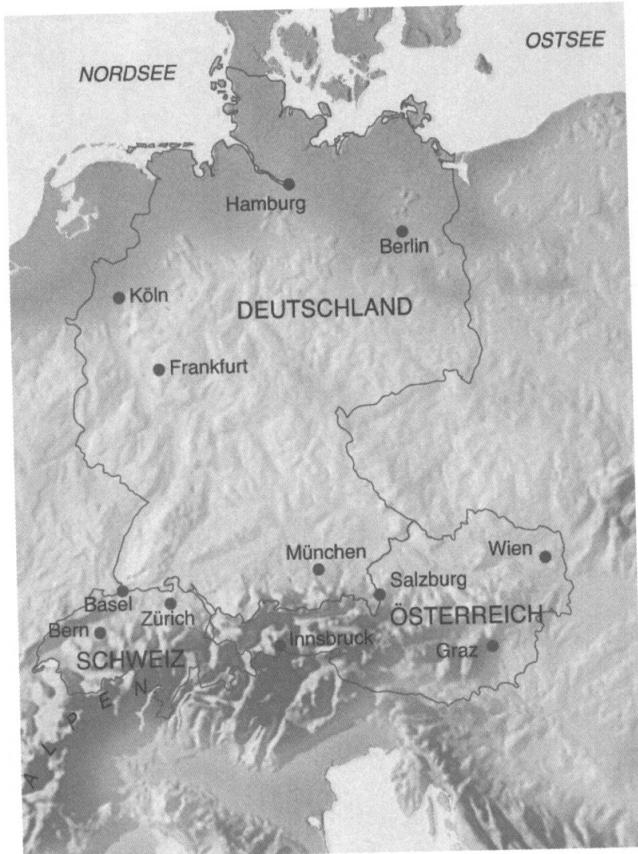

In work and more formal situations, *Auf Wiedersehen* is the most commonly used expression of farewell. *Tschüs(s)* is less formal, similarly to “bye bye” or “bye” in English. The Italian expression *Ciao* is heard more all the time all over the German-speaking areas of Europe. In southern Germany and in Austria, *Servus* works both for greetings and farewells. Austria has recently also seen the rise of *Baba*, a local form of our “bye-bye”. In Switzerland, the general formal farewell is *Auf Wiederluege*.

When answering the telephone, it is customary to answer with one’s name (both first and last but at least with the last name) and with the intonation going up toward the end: “*Angela Merkel*”, or “*Hier Köhler*”. When saying good-bye, instead of *Auf Wiedersehen* (*sehen* refers to seeing), on the phone one says *Auf Wiederhören* (*hören* referring to hearing).

What is your name?

Until the 1980s, German women generally took their husbands’ surnames after marriage and dropped their maiden names. Nowadays, when marrying, Germans have the option of taking the spouse’s name (men can take their wives’ names), of hyphenating both names or keeping their surname. Children of those who hyphenate names or keep their name, however, must have either the last name that both parents share, or they must take the last name of one of the parents. The most common surnames in Germany are those of old professions, such as *Müller* (miller), *Schmidt* (blacksmith) and *Schneider* (tailor).

Where is German spoken?

Globally, German is the ninth most spoken native language; in Europe, it is the most common native tongue: 100 million Europeans are native speakers. Approximately 82 million live in Germany, followed by Austria with 8 million. 64 % of the Swiss population speaks Swiss German, (Schwyzerdütsch), including the entire northern part of the country bordering on Germany.

Less well known is the fact that some 60 000 residents of eastern Belgium, along the German border, speak German as their native language and have their own representation in the Brussels parliament.

Liechtenstein, the smallest Alpine state, is also German-speaking, as is a significant portion of the population of Luxembourg.

There are ethnic German minorities in the north of Italy in South Tyrolia as well as in southern Denmark. In both regions, German is an official co-language. There are also enclaves of German speakers in many Eastern European countries, most notably in Russia (the so-called Volga Germans), Romania and the Czech Republic.

In all, 20 million people worldwide speak German as a first or second foreign language (as of 2000), 15 million of whom are Europeans.

Historical Notes

In October of 2005, and for the first time in Germany's history, a woman, Angela Merkel, was elected Chancellor of Germany. She succeeded Gerhard Schröder and brokered the establishment of the Grand Coalition (*Große Koalition*) of the CDU (the Christian Democratic Union) and the SPD (Social Democratic Party of Germany) whereby ministers come from both parties. Merkel, who holds a doctorate in physics, was born and raised in East Germany, where her father was a Lutheran pastor, a politically difficult position to hold under the SED (Socialist Unity Party of Germany) regime, which officially tolerated religion but in fact discouraged it actively.

Self-Evaluation

Self-Evaluation

When listening, I can understand (Hören)

forms of salutation (greetings) and farewell
when someone is introducing him/herself: *Ich heiße ...; Mein Name ist ...; Ich bin ...*
the person's origins: *Ich komme aus ...*
his/her language: *Ich spreche Türkisch.*

In written texts, I can understand (Lesen)

personal information (names, addresses, phone numbers, e-mail, postal codes, place of residence)

I can produce the following oral structures (Sprechen)

greetings and farewells: *Hello! Guten Tag. Auf Wiedersehen.*
Introductions: *Mein Name ist ... Ich heiße ... Ich bin ...*
Introducing another person: *Das ist Frau Huber.*
Asking for someone on the telephone: *Ist Frau Söll da, bitte?*
Talking about my origins and the languages I speak: *Ich komme aus ... Ich spreche ...*
Spelling a name or other information: *M – Ü – L – L – E – R*
Using forms of courtesy: *bitte/danke*

I can produce the following written forms of text (Schreiben)

fill out a form with personal information (name, place of birth, address, e-mail and place of residence)
a simple e-mail or text message
a simple personal ad with some personal data

1**Questions with an interrogative pronoun (*W-Fragen*) II**

As a reminder, *wie* essentially translates as “how” in English, but is also used in many cases where English would use “what”:

examples

Wie ist Ihre Adresse/Telefonnummer?
Wie ist Ihr Name?

What’s your address?
What’s your name?

wie can also combine with other words to create other interrogatives:

Wie alt sind Sie?
Wie lange dauert die Fahrt?

**2****The Preposition of Location in (*Lokalpräposition*)**

examples

Wo sind Sie geboren?
Wo wohnen Sie?

– In Chicago, in Amerika, in Deutschland
– (Ich wohne) in Frankreich, in Bern, auf Oahu.

Most places where one can live use the preposition *in* when responding to a *wo* question, but islands require *auf*, corresponding to the difference between living **in** California but **on** Oahu. (*Ich wohne in Kalifornien, auf Oahu.*)

3**Personal Pronouns (*Personalpronomen*) II**

singular

examples

Das ist Timo. Er kommt aus Finnland.
Das ist Corinna. Sie kommt aus Wien.

This is Timo. **He** is from Finland.
This is Corinna. **She** is from Vienna.

The third person singular (used when talking about another person instead of to the person) in German has different pronouns for masculine and feminine. There is also a neuter pronoun, *es*. (*Das ist das Brandenburger Tor. Es ist in Berlin.*) You will learn more about this in Chapters 4 and 6.

plural

examples

Das sind Víctor und Andrès.
Sie kommen aus Spanien.

These are Victor and Andrès.
They come from Spain

Das sind Greta und Veronika.
Sie kommen aus Schweden.

These are Greta and Veronika.
They come from Sweden.

Once nouns become plural, gender is no longer an issue. And they all have the same pronoun: *sie*.

If you find all these uses of *sie* confusing, that’s not unusual at the beginning. Look under **Getting It All Down** in this chapter for more on how to deal with all those *sie*’s.

Forms and Structures

Das ist/sind ...

examples	<i>Das ist Antonio Banderas. Er kommt aus Spanien.</i>	This is Antonio Banderas. He comes from Spain.
	<i>Das sind Melanie Griffith und ihre Mutter Tippi Hedren. Sie kommen aus Amerika.</i>	These are Melanie Griffith and her mother Tippi Hedren. They come from America.

Notice that here, too, the verb changes when saying *das sind* to introduce more than one person. In English, the pronoun changes from “this” or “that” to “those”, but in German, only the verb changes. The question will remain singular, however, even if asking about more than one person: *Wer ist das?*

4 Possessive Articles (*Possessivartikel*)

singular		
examples m	<i>Das ist mein Mann.</i>	This is my husband.
n	<i>Wo ist mein Kind?</i>	This is my child.
f	<i>Das ist meine Schwester und</i>	This is my wife, and
plural	<i>das sind meine Eltern.</i>	these are my parents.
singular		
m	<i>Wie ist Ihr Familienname?</i>	What is your last name?
n	<i>Wo ist Ihr Kind?</i>	Where is your child?
f	<i>Wie ist Ihre Adresse?</i>	What is your address?
plural	<i>Woher kommen Ihre Eltern?</i>	Where are your parents from?

Like English, German nouns can have one of three genders: masculine, feminine or neuter. Unlike English, grammatical gender has nothing to do with physical gender most of the time. Hence, you must learn a noun’s gender along with the noun. One marker for that gender is any article that precedes the nouns. Along with definite and indefinite articles (in English: *the* and *a* or *an*), possessives serve that function in German.

From the examples here, you can see that *mein* is the possessive corresponding to *ich*, and that masculine and neuter nouns such as *Mann* and *Kind* have no ending on *mein*. Feminine and plural nouns require an *-e* on the end of a possessive like *mein*: It becomes *meine*. Likewise, *Ihr* is the possessive for *Sie* and the same ending applies in the same cases. Just like *Sie*, its possessive *Ihr* is always capitalized.

5 Personal Pronouns (*Personalpronomen*) III

examples	<i>Das sind Eric und Inge, sie studieren hier in Berlin.</i>	This is Eric and Inge, they study here in Berlin.
	● <i>Harry, William, woher kommt ihr denn?</i>	Harry, William, where do you (all) come from?
	■ <i>Wir sind aus England, aus London.</i>	We are from England, from London.

The pronoun *ihr* is the plural of *du* and is used when addressing more than one person whom you know. The closest English equivalent is “you all” or “y’all”.

6 Verb: Conjugation (Verb: Konjugation) II

examples *Wir kommen aus Idaho.*

Er hat viele Freunde.

Sprechen Sie Deutsch?

infinitive		<i>komm-en</i>	<i>hab-en</i>	<i>sprech-en</i>	
singular	<i>ich</i>	<i>komme</i>	<i>habe</i>	<i>spreche</i>	<i>-e</i>
	<i>du</i>	<i>kommst</i>	<i>hast</i>	<i>sprichst</i>	<i>-st</i>
	<i>er/sie</i>	<i>kommt</i>	<i>hat</i>	<i>spricht</i>	<i>-t</i>
plural	<i>wir</i>	<i>kommen</i>	<i>haben</i>	<i>sprechen</i>	<i>-en</i>
	<i>ihr</i>	<i>kommt</i>	<i>hast</i>	<i>sprechen</i>	<i>-t</i>
	<i>sie/Sie</i>	<i>kommen</i>	<i>haben</i>	<i>sprechen</i>	<i>-en</i>
				verb with vowel change	

You will notice that the only places where anything changes in the stem of the verb are in the *du* and *er/sie* forms; in the case of *haben*, the *-b-* falls out of both forms, and in the case of *sprechen*, the vowel in the stem changes from *-e-* to *-i-*.

Only *sein* has a conjugation that follows no pattern. (see Chapter 1)

This is the entire present tense conjugation, and there is only one present tense. Unlike English, German does not differentiate between static and progressive action: *ich komme* is both “I come” and “I am coming”. In German, there is no split of the verb into two parts.

7**Numbers (Zahlen)**

1 eins	11 elf	6 sechs	16 sechzehn
2 zwei	12 zwölf	7 sieben	17 siebzehn
3 drei	13 dreizehn	8 acht	18 achtzehn
4 vier	14 vierzehn	9 neun	19 neunzehn
5 fünf	15 fünfzehn	10 zehn	20 zwanzig

From 13 to 19, the single number is combined with *zehn* to create the new number. Note the changes, dropping the final *-s-* on *sechs* in *sechzehn* and the second syllable on *sieben* to *siebzehn*. Just like English’s version, *elf* and *zwölf* are irregular.

Forms and Structures/Exercises

8 Communication Strategies

examples *Hallo, Timo, wie geht's?
Na ja, es geht.*

Hi Timo, how's it going?
Oh well, alright.

The combination of *na* and *ja* works in German much like the English "oh well" or a sigh. It is not necessarily negative but is not positive, either.

examples *Und wie geht es dir?
Ach, nicht so gut.*

And how are you?
Oh, not so well.

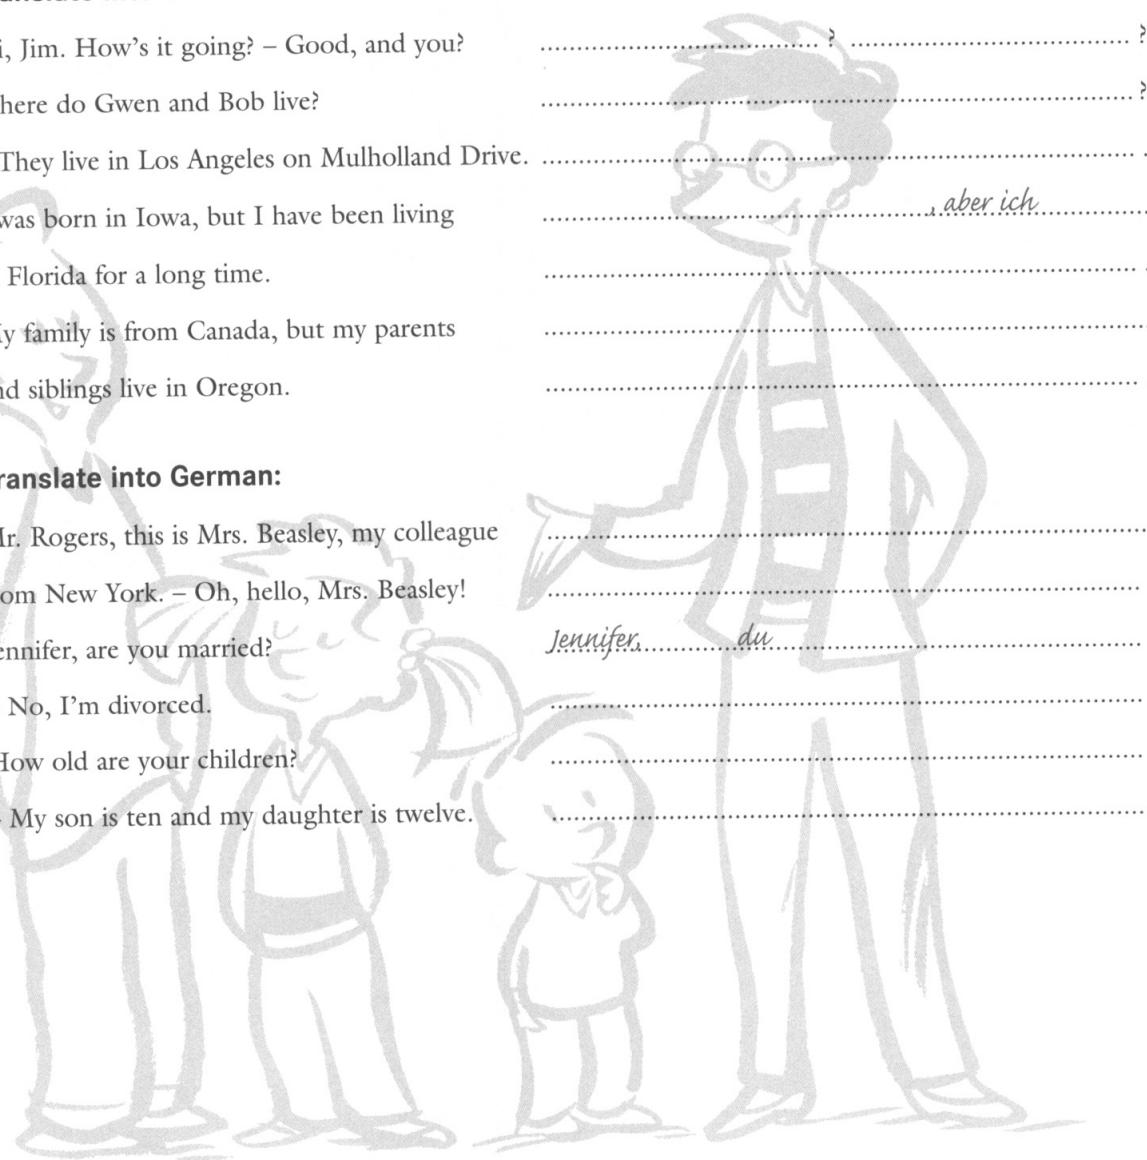

Ach in German is very similar to "oh" in English (it also combines with other words, like the English "oh" does) and is identical to the Scottish "ach".

9 Translate into German:

- a Hi, Jim. How's it going? – Good, and you?
- b Where do Gwen and Bob live?
– They live in Los Angeles on Mulholland Drive.
- c I was born in Iowa, but I have been living
in Florida for a long time.
....., aber ich
- d My family is from Canada, but my parents
and siblings live in Oregon.
.....

10 Translate into German:

- a Mr. Rogers, this is Mrs. Beasley, my colleague
from New York. – Oh, hello, Mrs. Beasley!
- b Jennifer, are you married?
– No, I'm divorced.
.....
- c How old are your children?
– My son is ten and my daughter is twelve.
.....

Listening and Pronunciation

Sentence Intonation

Ich komme aus Finnland! ↘

Ich spreche Finnisch und Englisch und ein bisschen Deutsch. ↘

In German speech, the most important element to be communicated usually comes at the end of the phrase, where it receives the main stress of the sentence, and the intonation goes downward.

Intonation of *W-Fragen*, partial and follow-up questions

Wer ist das? ↘

Woher kommen Sie? ↘

W-Fragen, those beginning with an interrogative, are generally spoken with the final intonation going downward.

Wie geht es Ihnen? ↘ *Danke, gut.* ↘ *Und Ihnen?* ↗

Wie geht's? ↘ *Ach, es geht.* ↘ *Und dir?* ↗

When asking a follow-up question, or when asking a partial question (such as one missing the verb), the intonation goes upward at the end.

Getting It All Down

In this chapter, you have learned the pronouns *sie/er* (she/he) and *wir/ihrt* (we/you all). It would be a very good idea to return to the first chapter and fill out your verb conjugation charts with these forms now, too. Be sure to complete any notes you have in your study journal.

Notice that you can tell the singular *sie* ("she") and the plural *sie* ("they") apart by their verbs. Notice the verb conjugations. The "she" form ends with a *-t*, the "they" form with *-n* or *-en*.

The second person formal *Sie* is then distinguished by its capitalization. And when hearing or listening, context will always provide enough information so that you know whether the speaker is talking to someone or about someone. Note, too, that formal *Sie* is both singular and plural.

Ich wohne hier schon lange ...

Notice that in English, we express this idea as a **past-tense** activity continuing into the present: *I have been living here for a long time*. German, however, like other European languages, views this as a **present-tense** activity: *Ich wohne hier schon lange*. Though it seems strange, by reviewing it regularly you can quickly grow accustomed to it.

Familiarity and Understanding

In Central Europe

Germany sits in the center of Europe, bordered by Denmark along the north, Poland, the Czech Republic and Austria to the east, Austria and Switzerland along the south, and France, Luxemburg, Belgium and the Netherlands along the west. The North Sea and Baltic Sea form natural northwest and northeast borders. Germany covers an area roughly equivalent to Illinois, Indiana and Ohio all together. The maximum distance from north to south is 544 miles (876 km) and at its widest from west to east 398 miles (640 km). The landscape moves from flat in the north to alpine in the south. Germany is a federal republic comprised of 16 states or *Bundesländer*. Since 1999, the federal capital has been Berlin, since the Eastern states reunified with the Western states on October 3, 1990. After Berlin, the largest cities are Hamburg, Munich (*München*), and Cologne (*Köln*).

Switzerland is almost 6500 square miles smaller in area than Lake Michigan and is a confederation comprised of 26 cantons. Switzerland is bordered by Germany, Austria, Liechtenstein, Italy and France. Of the four official languages, German is the dominant language, but Swiss German (*Schwyzerdütsch*) is spoken overwhelmingly and varies from one location to the next. The federal capital, Bern, is German-speaking, as are Zurich (*Zürich*), the largest city, and Basel.

Like Germany, Austria is also a federal republic comprised of nine *Bundesländer*. Vienna (*Wien*), the capital, was also the seat of the Habsburgs, the ruling house of the Austro-Hungarian empire. Austria is bordered by the Czech Republic in the northeast, Slovakia and Hungary to the east, Slovenia and Italy along the south, Switzerland and Liechtenstein in the West and Germany in the northwest. At 32,383 square miles, Austria is slightly larger than the state of Maryland, and over 62 % of Austria's land is in the Alps.

German Across Europe

The standard form of the language that you are learning in this course, known as *Hochdeutsch*, is used across Germany, Switzerland and Austria and is taught in schools. It is used in publishing and broadcasting. The spoken language, however, tends to differ by region and even in some areas by village. Local dialects vary not only by pronunciation but can also vary in vocabulary and structure as well. Food items in particular tend to have different names in different areas; you will learn more about this in Chapter 3.

Historical Notes**Where are you from?**

In the years since World War II, the number of people living in Germany not of German extraction has continued to grow. In the 1960s, during the period known as *das Wirtschaftswunder* (the economic miracle), foreign workers were recruited to come to Germany to provide much-needed labor. Many of these *Gastarbeiter* or guest workers have stayed and made their homes in Germany. As of 2003, of the approximately 82.6 million people living in Germany, about 7.3 million, or almost 9 % of the population, did not have origins in Germany. Of those, about 2.4 million are Turkish, and most of the remaining people are Italian, Greek, Polish and Austrian.

In Austria, due in large part to its historic ties with many Eastern European nations, 9.8 % of the population was non-native as of 2006, with over 305,000 coming from the former Yugoslavia (once part of the Austro-Hungarian Empire) and over 110,000 from Turkey.

Switzerland, too, has a significant foreign population: resident and temporary foreign workers make up 21 % of the population, and approximately 35 % of all marriages in Switzerland are bicultural.

Self-Evaluation**When listening, I can understand (Hören)**

questions regarding my personal information: *Wie heißen Sie? Woher kommen Sie? Wo sind Sie geboren? Wie ist Ihre Adresse? Sind Sie verheiratet? Haben Sie Kinder?*

questions regarding my personal well-being and can respond appropriately:
Wie geht's? – Es geht/Danke, sehr gut.

numbers from 1 to 10: *Meine Telefonnummer ist .../Er ist vier Jahre alt.*

In written texts, I can understand (Lesen)

brief e-mail messages: *Meine Freunde/Meine neue Wohnung/...*

written structures containing personal information

brief, simple postcards: *Hello, wie geht's?/...*

I can produce the following oral structures (Sprechen)

introducing my family and friends to each other: *Das ist mein ...; Das ist meine ...*

telling where I am from and where I live: *Ich komme aus ...; Ich wohne/lebe in ...*

asking others what their names are, where they are from and where they live:
Wie heißen Sie? Woher kommen Sie? Wie ist Ihre Adresse?

saying how I am and asking how others are: *Wie geht es Ihnen? – Danke, gut.*

giving a telephone number

explaining familial relationships: *Das ist mein Bruder und seine Frau.*

I can produce the following written forms of text (Schreiben)

an e-mail or postcard with a simple description of myself or someone else

filling out a form with personal information (name, place of birth, address, telephone number, e-mail and place of residence)

1 Indefinite Articles and Negative Articles (*Unbestimmter Artikel und Negativartikel*)

a Indefinite Article

examples singular

m	<i>Ist das ein Apfel?</i>	Is that an apple?
n	<i>Das ist ein Brötchen.</i>	That's a roll.
f	<i>A ist vielleicht eine Tomate.</i>	Maybe A is a tomato.
plural	<i>Im Korb sind Birnen.</i>	In the basket are pears.

Indefinite articles are used when mentioning an individual person or thing for the first time in a conversation or text.

The indefinite article *ein* uses the same endings as the possessive article *mein* – the feminine takes an *-e* on the end. There is, however, no indefinite article in the plural, and this absence of any article is called *Nullartikel* in German (zero article).

b Negative Article

examples singular

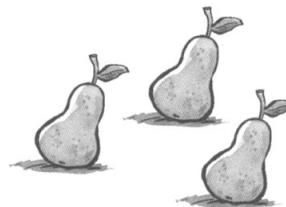

m	<i>Das ist doch kein Apfel, oder?</i>	That's not an apple, is it?
n	<i>Ich möchte heute kein Ei.</i>	I don't want an egg today.
f	<i>Karl issst keine Pizza.</i>	Karl doesn't eat pizza.
plural	<i>Haben Sie heute keine Kiwis?</i>	Don't you have any kiwis today?

Kein and *keine* (again, the same forms as *mein* and *meine*) is used in place of an indefinite article or a zero article to negate that noun. Notice that in German, the noun is negated in these instances, not the verb (as in the English I **don't** want ... and **don't** you have **any** ...). Note, too, that while a plural noun might not have an article if it is positive (i.e. “*ich habe Äpfel*”), that *keine* will still be used to make it negative (“*ich habe keine Äpfel*”).

2 Nouns: singular and plural (*Nomen: Singular und Plural*)

example *Sind das Äpfel?* *Nein, Birnen.*

In German, nouns form their plurals in several ways:

a Some take fixed endings:

-e	<i>Brot – Brote</i>
-(e)r	<i>Ei – Eier</i>
-(e)n	<i>Tomate – Tomaten</i>
-s	<i>Kiwi – Kiwis</i>

b While others add an umlaut to an *a*, *o*, or *u* in the noun:

Apfel – Äpfel

And still others combine an ending together with an umlaut:

Wurst – Würste

Haus – Häuser

Forms and Structures

c And then there are nouns whose singular and plural forms are identical: *Brötchen – Brötchen*

There are a few patterns for predicting a plural form, but there are no absolutes. The best practice is to learn the gender (*der, die, das*) and the plural form when you learn the noun itself. It also helps over time to list nouns whose plural forms are similar.

In the glossary section of this book, as in most dictionaries, nouns are listed with their plural form following in abbreviated form, as you see here below:

a *Brot, -e*

b *Apfel, -e*
Wurst, -e

c *Brötchen, -*

3 Yes/No Questions (*Ja-/Nein-Fragen*) I

examples

Haben
Brauchen

Sie
wir

Tomaten?
Salz?

Ja.
Nein.

Do you have tomatoes? – Yes.
Nein. Do we need salt? – No.

1
verb

2
subject

Yes/no questions, also called closed questions, do not begin with an interrogative. Thus, the verb is in first position. Also note that the verb is not split in two parts: there is only one present tense in German and it has only one form.

4

Expressing likes/dislikes: *gern/nicht gern* and *schmecken*

examples

Trinkst du gern Bier?
Was isst du nicht gern?

Do you like to drink beer?
What don't you like to eat?

German has many ways to express liking and disliking something. The most common way is to use the adverb *gern* with the verb. It has no literal, word-for-word translation.

To indicate dislike, *nicht* comes before *gern* (*Was isst du nicht gern?*)

Schmecken indicates how something tastes. It is not the expression for trying or sampling something.

example

Das Fleisch schmeckt gut.

The meat is good/tastes good.

You should also note that *schmecken* is very often used in a question to ask whether something tastes good, but the word *gut* is understood: *Schmeckt es?*

5

Numbers (*Zahlen*)

12 *zwölf*
13 *dreizehn*
14 *vierzehn*
15 *fünfzehn*
16 *sechzehn*
17 *siebzehn*
18 *achtzehn*
19 *neunzehn*

20 *zwanzig*
30 *dreiβig*
40 *vierzig*
50 *fünfzig*
60 *sechzig*
70 *siebzig*
80 *achtzig*
90 *neunzig*

1 *eins*

21 *einundzwanzig*

Multiples of 10 have the suffix *-zig* except for 30, which has an *β* instead of a *z*.
The number *eins* drops its *-s* when it joins to multiples of 10.

6 Weights and Measures

- examples *Was kosten 100 Gramm Käse?* What do 100 grams of cheese cost?
Ich brauche 2 Kilo Äpfel. I need two pounds of apples.

Note that the element of weight or measure does not take any ending in the plural, and there is no preposition before the item.

- example *1 Pfund Rindfleisch, bitte.* A “pound” of beef, please.

Note that in German, *ein Pfund* is 500 grams or a half-kilo. An English pound is slightly less (453.3 grams).

<i>1 Gramm (n)</i> – 100 Gramm
<i>1 Pfund (n)</i> – 3 Pfund
<i>1 Kilo (n)</i> – 2 Kilo
<i>1 Becher (m)</i> – 2 Becher

<i>1 Flasche (f)</i> – 2 Flaschen
<i>1 Dose (f)</i> – 2 Dosen
<i>1 Packung (f)</i> – 2 Packungen

7 Packaging and Currencies

When referring to the packaging in which one buys certain items, there is a rather curious pattern: packaging with masculine and neuter names do not use their plurals when they are used to describe amounts of something else:

- example *1 Becher (m) Joghurt – 2 Becher Joghurt*

But feminine packaging units do use plural forms:

- examples *1 Flasche (f) Wasser – 2 Flaschen Wasser*
1 Dose (f) Tomaten – 2 Dosen Tomaten

Similarly, currencies that are masculine (such as Euro, Dollar or Franken) or neuter (such as Pfund) also do not change form for plural amounts, but feminine currencies (such as Krone or Rupie) do (both add an *-n* in the plural: 100 Rupien). The sole exception is the Peso, which is neuter but still adds an *-s* in the plural (100 Pesos).

8 Compound Nouns (*Zusammengesetzte Nomen*)

- examples *mein Familiennname* *mein Lieblingsessen* *mein Wörterbuch*
meine Telefonnummer *eine Gemüsesuppe* *eine Landkarte*

If some long German words takes you aback, you are not alone. Great minds including Mark Twain and Fyodor Dostoevsky have struggled with this, too. It is useful, though, to note that many of these longer, compound words are no different than English compound words, minus the space between. German also has a lot fewer Greek and Latin roots, making it easier to figure out what words mean. In the case of compound nouns, often they are two nouns put together (such as *Familiennname*, *Telefonnummer*, or *Wörterbuch*) but sometimes, another part of speech will be used to change the tenor of the noun involved. *Lieblingsessen*, for example, builds off of *Essen*, but *Lieblings-* is a noun prefix indicating “favorite”.

When learning vocabulary, look for the parts of words. Don’t think about creating words with them, but use the parts instead to master the whole.

9 Communication Strategies: A bit more about *bitte*

- examples *Das ist doch kein Apfel, oder?* That's not an apple, is it?
Wie bitte? Excuse me?/Pardon?/What?

As mentioned in Chapter 1, *wie* is more than just “how”. To ask someone to repeat what you didn't hear or understand, *Wie bitte?* is the most common way.

- examples *Hast du Tomatensoße?* Do you have [any] tomato sauce?
(Ja,) bier bitte. (Yes.) Here you are./Here you go.

In addition to “please”, *bitte* also conveys courtesy when handing something to someone.

10 Translate into English:

a *Was kostet ein Pfund Rindfleisch?*

– 3,99 Euro.

..... ?

..... ?

b *Isst du gern Fisch? – Ja, sehr gern.*

c *Möchten Sie sonst noch etwas?*

– Nein danke, das ist alles.

..... ?

..... ?

..... ?

11 Translate into German:

a This isn't a tomato, is it?

– No, it's a kiwi.

..... ?

..... ?

b How do you say “basket” in

German? – In German, a basket
is called “Korb“.

..... ?

..... ?

..... ?

c Do you have any bananas?

– No, I don't have any bananas.

..... ?

..... ?

But I do have oranges.

..... ?

..... ?

Aber ich

..... ?

..... ?

d Bananas cost 4.50 € a kilo.

– Huh? How much?

..... ?

..... ?

..... ?

Listening and Pronunciation

Long and Short Vowels (a-o)

Banane • *Tomate* • *ah*
Foto • *Oma* • *Sohn*

As you saw and heard in Chapter 1, vowels followed by one consonant are long. This is true for vowels in stressed syllables. Vowels which are followed by an <h> are also long (*Sohn*) even if they are unstressed as in some compound nouns like *Autobahn*.

If vowels are followed by more than one consonant, they are short:

Stadt • *Kartoffel*

Intonation of yes/no questions

Sprechen Sie Deutsch? ↗ Do you speak German? ↗

Closed, yes/no questions intone upward, just as in English.

Pronunciation of numbers

<i>vierzehn</i>	-	<i>vierzig</i>
<i>fünfzehn</i>	-	<i>fünfzig</i>
<i>sechzehn</i>	-	<i>sechzig</i>
<i>siebzehn</i>	-	<i>siebzig</i> , etc.

Be sure to practice the difference between the teens, which end in *-zehn*, and the multiples of ten, which end in *-zig* (or *-ßig* for 30). Note that the final <g> is a soft sound, often much like the <ch> in *ich*.

Getting It All Down

Again, it truly bears repeating that vocabulary learning is more effective if you put in the time initially to learn words in a meaningful context. When learning food names, for example, take the time not only to learn fruits together, but also learn them in combination with words you associate them with. The more connections a word has in your own mind, the more deeply it embeds in your memory and can be recalled when you need it.

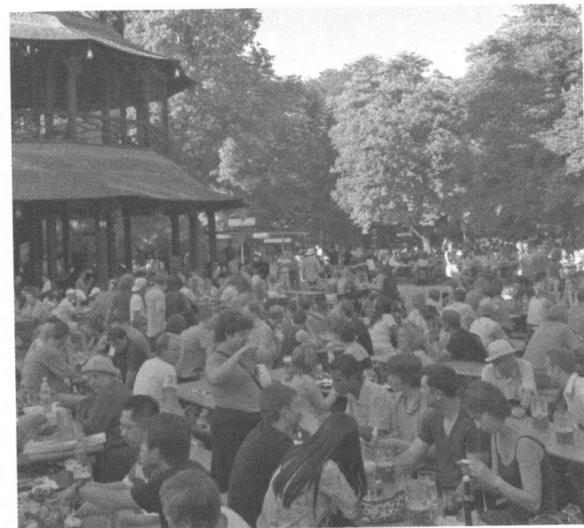

Familiarity and Understanding

Eating out *auf Deutsch*

Other than spotting a dog quietly lying at its owner's feet in a restaurant, the most surprising thing for North Americans dining in German restaurants is the question *Ist hier noch frei?* (Is this seat taken?). Particularly in *Biergärten* and other less formal establishments, it is standard practice to sit at any table where there is room. Sharing a table with strangers does not mean sharing a meal or conversation – it's just a practical use of limited space.

Smoking is still far more prevalent in central Europe than in North America. Though there is growing public support for smoke-free areas, it is not yet as common. Restaurants are now smoke-free, in other public areas like at airports or train stations one still finds special areas for smokers.

Toasting

When drinks are served, whether alcoholic or not, it is customary to say *Prost!* and raise glasses before drinking. It is not formal, rather a matter of course. One also hears *Zum Wohl!* often, more so when drinking wine.

Check, please

After telling the server that you would like to settle up, if you are not alone, the question *Zusammen oder getrennt?* will follow. Unlike the American expectation that one person will pay the check, in the German-speaking countries there is no such assumption.

Tipping, too, is different. The service is included in the price of the meal, so the tip is truly a gratuity, and 5–10 % is sufficient. The easiest way to tip is to simply round up to the next Euro or Franc, maybe two, three tops.

You say *Kartoffel*, and I say *Erdapfel* ...

As mentioned in the previous chapter, names of food items can vary greatly across the German-language landscape. The standard name *Kartoffel* can be replaced near the French border with *Erbirne* ("ground pear") then *Erdapfel* ("ground apple") in Bavaria and Austria and even with *Herdapfel* ("stove apple") in Switzerland. Since in French a potato is called *pomme de terre* (apple of the ground), one can assume some interaction at some point in history. The same thing happens with tomatoes, carrots and other produce items.

Grocery Shopping

Europeans shop for groceries more frequently and in smaller quantities. Not only does fresh food taste better, but refrigerators are much smaller in Europe, so there is no place to keep large quantities. In addition to the *Supermarkt*, there are small local shops that carry produce and packaged goods. Another popular place to shop is *der Markt*, which is usually held one day a week (*Markttag*). Here farmers sell their products, many of them organic, directly to shoppers. The cost is higher but so is the quality.

When customers are lined up waiting, the merchant will often ask „Wer kommt jetzt?“ or „Wer bekommt?“ usually followed by a courteous „bitte“ or „bitte schön“.

Historical Notes

“The future is green” – *Die Zukunft ist grün*

The Greens, known officially in Germany as *Bündnis 90/Die Grünen* since their merger with *Alliance 90* in 1993, is not the largest party in Germany, but since its founding on the national level in 1979, it has had a major impact on German policy in all areas, not just the environment. In 1998, it joined with the Social Democrats (SPD) to form a coalition government that held until 2005. Though the SPD considers itself the Left, the Greens have pushed harder for many left-wing causes, resulting in greater rights for gays and foreigners, tougher environmental protection measures, and better conditions for domestic partners. Since 2006, the Greens have stood in opposition to the Grand Coalition of Chancellor Merkel.

Self-Evaluation

When listening, I can understand (Hören)

prices: *Ein Kilo Tomaten kostet 1,99 Euro.*

purchase amounts: *Wie viel möchten Sie? – Ein Kilo. 100 Gramm Käse kosten ...*

which foods are mentioned in conversation

what I do and don't like

A large rectangular area for writing, divided into three vertical columns by grey lines. This space is used for the 'When listening' section.

In written texts, I can understand (Lesen)

a sale flyer, i.e. prices and quantities of food items

a simple kitchen recipe

A large rectangular area for writing, divided into three vertical columns by grey lines. This space is used for the 'In written texts' section.

I can produce the following oral structures (Sprechen)

identifying food items or asking what they are called in another language:

Was ist das? – Das ist eine Tomate./Wie heißt das auf Deutsch? – Apfel.

stating quantities and prices: *100 Gramm Käse kosten 1,10 €.*

asking for foods at a store or market: *Ich brauche/Ich möchte ...*

saying what I like to eat or what is good to eat: *Das schmeckt gut.*

counting: *eins, zwei, drei, ... eine Million*

A large rectangular area for writing, divided into three vertical columns by grey lines. This space is used for the 'I can produce the following oral structures' section.

I can produce the following written forms of text (Schreiben)

A shopping list with the quantities and prices of items

A large rectangular area for writing, divided into three vertical columns by grey lines. This space is used for the 'I can produce the following written forms of text' section.

Forms and Structures

1

The Definite Article (*Bestimmter Artikel*)

examples singular

m	<i>Hier ist der Balkon.</i>	Here is the balcony.
n	<i>Hier ist das Bad.</i>	Here is the bath.
f	<i>Hier ist die Küche.</i>	Here is the kitchen.
plural	<i>Hier sind die Kinderzimmer.</i>	Here are the children's rooms.

As indicated back in Chapter 2, a noun's gender is indicated by its article. The articles *der*, *das* and *die* are definite articles, equivalent to “the” in English, but specific to each gender, just as the indefinite articles *ein* and *eine*, the possessives *mein* and *meine* and the negative articles *kein* and *keine* are.

Just as *ein*, *kein* and the possessive articles have an *-e* on the end for both feminine and plural nouns, so the article *die* applies to both feminine and plural nouns. Context will still allow you to tell whether a noun is singular feminine or plural: look at the verb in the plural example, and when you have made yourself familiar with enough plural forms of nouns, that too will tell you.

2

Personal Pronouns (*Personalpronomen*) IV

examples singular

m	<i>Hier ist der Balkon. Er ist ...</i>	Here is the balcony. It is ...
n	<i>Hier ist das Bad. Es ist ...</i>	Here is the bath. It is ...
f	<i>Hier ist die Küche? Sie ist ...</i>	Here is the kitchen. It is ...
plural	<i>Hier sind die Kinderzimmer? Sie sind ...</i>	Here are the children's rooms. They are ...

Personal pronouns do not only refer to people. Any pronoun that replaces a noun must match the noun's gender. Therefore, even though a balcony is not physically masculine, its noun in German is, and it has a masculine pronoun. Thus, *er* does not only translate as “he”, but as “it” as well. The pronoun *es* is only used for items whose noun is neuter.

When looking up words in a dictionary, you may encounter either the definite article with the noun or an abbreviation of its gender as in the tables above along the left. Again: it is imperative that you learn the noun's gender as you learn the noun.

3

Adjective (*Adjektiv*) I

examples *Der Flur ist breit.*
Die Küche ist hell.
Das Bad ist schön.
Die Zimmer sind groß.

The hallway is wide.
The kitchen is bright.
The bathroom is beautiful.
The rooms are large.

Adjectives that do not precede nouns, called predicate adjectives, do not take any endings. The form you find in your glossary or in a dictionary is the form that appears after a form of the verb *sein*.

4 Negation with *nicht* (Negation mit „nicht“)

examples	<i>Die Banane schmeckt nicht.</i> <i>Frau Stifter wohnt nicht hier.</i> <i>Der Stuhl ist nicht schön.</i> <i>Das ist nicht mein Stuhl.</i> <i>Bill Clinton ist nicht der Präsident.</i>	The banana doesn't taste good. Ms. Stifter doesn't live here. The chair is not pretty. That's not my chair. Bill Clinton is not the President.
----------	---	--

In Chapter 3, you learned about the negative article *kein*, used to negate nouns.

Das ist (doch) kein Stuhl. That's not a chair.

When negating other parts of speech, such as verbs, adjectives or adverbs, the word *nicht* is used, as you can see in the first three examples above. It is also used to negate nouns in some cases, such as when a noun has a possessive article (*Das ist nicht mein Stuhl.*). It is also used when a noun has a definite article (*Bill Clinton ist nicht der Präsident.*).

If a noun has an indefinite article or no article, then it is negated with *kein*.

The word *nicht* comes after a verb that it negates (remember, German verbs do not split like in English, so the German manner is more like Kennedy's quote, "ask not what your country can do for you"), but it comes before other parts of speech (*nicht der Präsident, nicht schön*).

5 Adverbs (Adverbien) I**a Adverbs of location:**

examples	<i>Und wo ist hier die Küche?</i> <i>Die Küche ist dort.</i>	And where is the kitchen here? The kitchen is there.
----------	---	---

The adverbs *hier* and *dort* answer the question *wo*? Note that there is no difference in meaning between *da* and *dort*.

**b Adverbs of mode or manner:**

examples	<i>Das ist natürlich kein Apfel.</i> <i>Das ist bestimmt das Arbeitszimmer.</i> <i>A ist vielleicht eine Tomate.</i>	Of course, that's not an apple. Certainly, that's the workroom. Perhaps A is a tomato.
----------	--	--

These adverbs describe varying degrees of certainty. Whereas English tends to begin sentences with such adverbs (and set them off with a comma), German puts them right after the verb. (German speakers also start sentences with adverbs, but you will encounter that in Chapter 5.)

6 Expressing liking: the verb *gefallen*

examples	<i>Wie gefallen Ihnen die Möbel? (Wie finden Sie die Möbel?)</i> <i>Gefallen dir die Fotos? (Hast du die Fotos gern?)</i>	How do you like the furniture? Do you like the photos?
----------	--	---

In Chapter 3, you learned about the adverb *gern* to express liking something. Another way to do this is with the verb *gefallen*. This construction is not intuitive to a native speaker of English, either: it literally means that the object in question is pleasing to someone, so it feels a bit backward until you grow accustomed to it.

When talking about eating and drinking, *schmecken* is used, as *gefallen* is not appropriate:

example *Wie schmeckt Ihnen die Pizza?* How does the pizza taste (to you)?

Like the question *Wie geht es?* in Chapter 2, this idiom also uses some different pronouns. When speaking with *Sie*, the pronoun *Ihnen* is used; with *du*, *dir* is used.

For the time being, the easiest way to learn to use *gefallen* is to memorize these forms:

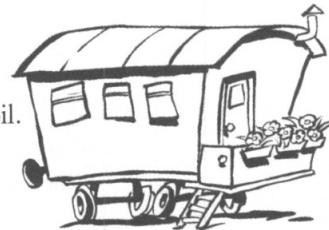

Wie gefällt/gefallen dir ...? Wie gefällt/gefallen Ihnen ...?

Wie schmeckt/schmecken dir ...? Wie schmeckt/schmecken Ihnen ...?

7

Conjunctions (*Konnektoren*)

examples *Hier ist (der) Essig und da ist (das) Öl.* Here's (the) vinegar and there's (the) oil.
Die Wohnung gefällt mir sehr gut, aber sie ist auch sehr teuer. I really like the apartment, but it's really expensive, too.

The conjunctions *und* and *aber* connect two main clauses (complete thoughts or sentences) or items in sequence.

Be sure you don't confuse the modal particle *aber* with the conjunction: see Chapter 1, "Communication Strategies" or this example:

Die Wohnung ist aber sehr teuer! The apartment is very expensive (more so than I would have expected)!

8

Communication Strategies

examples *Sag mal, wie gefällt dir die Wohnung?* Say, how do you like the apartment?
Sagen Sie mal, ist hier auch eine Küche? Say, is there a kitchen here, too?

The expressions *sag mal* and *sagen Sie mal* are a gentle way of introducing a question into a situation. It is less formal than *Entschuldigung*, and suggests a certain level of confidence between the speaker and the person addressed.

9

Translate into English.

- a *Ich suche eine Ferienwohnung.*
- *Wie viel möchten Sie denn bezahlen?* ?
- b *Wie gefällt Ihnen London?* ?
- *Die Stadt ist schön, aber ein bisschen teuer.*
- c *Sag mal, ist hier auch eine Toilette?* ?
- *Ja, sie ist da.*

10 Translate into German.

- a** Where's the dictionary? ?
 – It's here.
- b** How do you like the hotel? ?
 – It's lovely, but the rooms are very small.
- c** Do you like the wine? It's a Riesling. *ein Riesling*.
 – I like it very much.

Listening and Pronunciation**Long and Short Vowels (e-i)**

leben • *steht*
Lina • *ihr* • *Miete*

Like with other vowels, one consonant after it, or an <h> makes the <e> or <i> long. In the case of <i>, an <e> following it also makes it long.

Two or more consonants makes the vowel short:

Bett • *denn*
Zimmer • *sind*

Note: if the combination *ie* is unstressed, then the <i> is pronounced separately from the <e> (*Fa-mi-li-e*, *Spa-ni-en*, *I-ta-li-en*).

Accent stress in compound nouns

Wohnen + *Zimmer* = *Wohnzimmer*
Küche + *Schrank* = *Küchenschrank*

You will remember from Chapter 1 that German words generally stress the first syllable (with the exception of foreign words and those beginning with certain prefixes). This holds true when words are combined to form compound nouns – unless the first syllable is *be-*, *emp-*, *ent-*, *er-*, *ge-*, *ver-* or *zer-*, or if the word came to German from another language: the first syllable gets the stress in a compound noun.

Getting It All Down

Have you tried using color as an aid to learning? By putting all masculine nouns on one color card, or by noting them in one color ink, and doing the same with feminine and neuter nouns, you give your brain one more tool to use in recalling gender.

Familiarity and Understanding

Where do people live?

Germans, Swiss and Austrians do not place the same importance on owning a home that North Americans do. 44 % of Germans in the nine western *Bundesländer* rent their homes, and in the eastern *Bundesländer*, the percentage is 34 %. Consequently, the notion of a “renter’s mentality” is not that prevalent in the German-speaking countries; renters often invest large amounts of time, money and sweat equity in renovating and maintaining rental units, without reimbursement from property owners.

Young people generally aim to leave the nest as early as possible, often splitting an apartment among several individuals. This arrangement, known as a *Wohngemeinschaft* or WG for short, is especially common among post-secondary students. Since university residence halls are far fewer than in North America, it is even more common there than here.

Ads for apartments give the total number of rooms, such as a 4-room-apartment (*4-Zimmer-Wohnung*), which would have a living room, possibly a dining room, and as many bedrooms that bring the total room count to 4. Kitchen and bath are not included in the count.

When moving in to a new building, it is customary to introduce oneself to the neighbors – they will generally not seek out the new tenants.

A Few Famous Germans

A quick introduction to the „berühmte Deutsche“ in exercise A3 (textbook):

Johann Wolfgang von Goethe (1749–1832)

is not only the foremost author in the history of German literature, but a seminal figure in the sciences as well. His literary works encompass the *Sturm und Drang* (Storm and Stress), Classic and Romantic movements, and his drama in two parts, *Faust*, is one of the highest achievements in world literature. His theories of color optics (*die Farbenlehre*) prefigured many developments in 20th-century optics.

Thomas Mann (1875–1955)

is one of the best-known authors of the 20th century. At the age of 25, he created a literary sensation with his novel *Buddenbrooks*, a tale of a bourgeois family's rise and fall over several generations. He was awarded the Nobel Prize for Literature in 1929. Among his many works, best known worldwide are *Der Tod in Venedig* (Death in Venice), *Doktor Faustus* (a novelistic interpretation of Goethe's drama) and *Der Zauberberg*. During the Third Reich, Mann lived in exile and broadcast anti-Nazi essays via the BBC.

**Kaiserin Sissi (1837–1898)**

is the popular name for Elisabeth, Empress of Austria and Queen of Hungary. She was Bavarian-born and married Emperor Franz Josef at the age of 16. She was famous in her lifetime for her love of physical activity, her rejection of many court customs and her obsession with her appearance (she starved herself periodically and observed strict dietary, exercise and beauty regimens), and was tragically assassinated by an anarchist while visiting Geneva, elevating the myth surrounding her in much the same way that Princess Diana's image is preserved in the 21st century.

Her fame then skyrocketed again in the 1950s on the heels of actress Romy Schneider's portrayal of her in the *Sissi* films of that era. To this day, tourists flock to many attractions in Vienna dedicated to her memory, and the *Sissi* films are aired every year on television at Christmastime.

Ludwig II von Bayern (King Ludwig II of Bavaria) (1845–1886)

is also known as the *Märchenkönig* (the Fairy Tale King). He was obsessed with the person and music of Richard Wagner and his most famous accomplishment, his *Schloss Neuschwanstein* (Neuschwanstein Castle), the model for the Disneyland Castle, was constructed so that each room depicted a scene from one of Wagner's operas. This was not the only castle he built, and combined with his other eccentricities, those at court were moved to depose him from his throne. Despondent, he drowned himself in the *Starnberger See* (Lake Starnberg) days later. Like Sissi, Ludwig is a huge draw for tourists who visit his many castles, attend a musical in Füssen about his life, and drink *König-Ludwig-Dunkel* (a dark beer named for him).

**Historical Notes****Recent History, Recent Cinema**

Recent years have witnessed a resurgence in the profile and quality of German cinema. The massive social and political changes of the 1990s have acted as a springboard for German filmmakers to deal with modern German history in exciting ways. In the following, there are a few powerful examples.

Schwarzfahrer (1993, Pepe Danquart): this Oscar-winning short film deals with problems of racial integration in post-unification Berlin using a scathing and hilarious surprise ending to make its case against racism.

Nostalgia for GDR-life, known as “*Ostalgie*”, is on display in “*Good Bye, Lenin!*” (2003, Wolfgang Becker), which looks at the change from GDR to the Federal Republic via the story of a son's love for his mother; while Oscar-winner “*Das Leben der Anderen*” (The Lives of Others, 2006, Florian Henckel von Donnersmarck) presents the damaging effects of *Stasi* (State Security) surveillance on GDR citizens.

The tragedies of the Third Reich have found new representation in the Oscar-winning “*Nirgendwo in Afrika*” (Nowhere in Africa, 2001, Caroline Link), the story of a Jewish family fleeing to Kenya to avoid the Holocaust, “*Der Untergang*” (Downfall, 2004, Oliver Hirschbiegel), a depiction of the last days of the Third Reich in Hitler’s bunker, and “*Sophie Scholl: Die letzten Tage*” (Sophie Scholl: The Final Days, 2005, Marc Rothemund), a shattering portrayal of Sophie’s refusal to compromise her beliefs in the face of execution by Nazi officials.

The difficulties faced by second-generation Turkish women in Germany comes to the fore in “*Gegen die Wand*” (Head-On, 2003, Fatih Akin) a very controversial film by an important young writer/director in the Turkish-German community.

“*Lola rennt*” (Run Lola Run, 1999, Tom Tykwer) does not tackle history but offers a powerful post-modern image of life in modern Berlin as it follows Lola’s repeated attempts to raise 100,000 marks in 20 minutes to save her boyfriend’s life.

Self-Evaluation

When listening, I can understand (Hören)

how one describes a home: *Das ist das Arbeitszimmer./Das Bad ist klein.*

differences between one home and another

In written texts, I can understand (Lesen)

classified housing ads: rent prices, square area

information about the style of an apartment (apartment type, colors, furniture)

a brief description of an apartment in an ad or an e-mail

a short article like a horoscope

I can produce the following oral structures (Sprechen)

describe a floorplan or a house: *Die Küche ist hier. Das Haus ist billig.*

say whether I like someone or something: *Wie gefällt Ihnen die Wohnung?*

– *Sehr gut./Ich finde die Frau ...*

ask or answer where something is: *Wo ist das Bad? – Hier./Dort.*

state opinions or suppositions: *Das ist bestimmt ... ; Ich glaube, ...*

I can produce the following written forms of text (Schreiben)

short e-mail messages: *Meine Freunde/Meine neue Wohnung/...*

an e-mail or simple postcard: *(meine Wohnung)*

a text message (SMS) *(Wohnung suchen/Berlin/...)*

1 Separable Verbs (*Trennbare Verben*)

examples *auf-räumen*

Timo räumt die Wohnung auf. Timo cleans up/is cleaning up the apartment.

fern-sehen

Corinna sieht fern. Corinna watches/is watching TV.

Separable verbs consist of a verb and a prefix. When the verb conjugates to match its subject, the prefix separates and goes to the end of the phrase. The prefix changes the meaning of the verb, as in these examples:

sehen = to see

fernsehen = to watch television

ansehen = to view, look at

hören = to hear

zuhören = to listen to someone or something

In a few cases, the prefix completely changes the meaning of the verb:

hören = to hear

aufhören = to quit, cut it out, stop doing something

fangen = to catch

anfangen = to begin, start

The prefix goes to the end of the phrase, regardless of how many elements are in the phrase. The conjugated verb, as always, remains anchored in the second position:

Anton steht (am Samstag schon um 6 Uhr) *auf.*
2 final
verb prefix

2 Telling Time (*Uhrzeit*)

examples

Wie spät ist es? What time is it?
Es ist neun (Uhr). It's nine (o'clock).

9.00 Uhr *neun (Uhr)*

nine (o'clock)

9.15 Uhr *Viertel nach neun*

quarter past nine

9.45 Uhr *Viertel vor zehn*

quarter to ten

9.30 Uhr *halb zehn*

half past nine

9.20 Uhr *zehn (Minuten) vor halb zehn/ zwanzig (Minuten) nach neun*

nine twenty

9.25 Uhr *fünf (Minuten) vor halb zehn*

twenty-five past nine

9.35 Uhr *fünf (Minuten) nach halb zehn*

twenty-five to nine

9.40 Uhr *zehn (Minuten) nach halb zehn/ zwanzig (Minuten) vor zehn*

twenty to ten

There are two ways of expressing time in German.

The 12-hour clock, which we use, is conversational and informal. The word *Uhr* (for o'clock) is not needed, and shortcuts such as *halb* and *Viertel vor/nach* are common. As you can see in the examples above, German also tells how many minutes before and after the half marker there are.

Forms and Structures

Note the following points: *halb* (not capitalized, no preposition) indicates 30 minutes before the next hour. It is the opposite of the British “half” and the American “half past”. *Viertel* is capitalized and requires a preposition, either *vor* or *nach*.

The 24-hour clock is official, used for travel schedules and other official publications, and is used in speaking to provide clarity. The form is always the same: *x Uhr (y)*. The word *Uhr* is always used, minutes are given after *Uhr*, and there is no mention of halves or quarters, nor is there any mention of before or after noon – numbers higher than 12 hours indicate times after noon.

13.15 Uhr *dreizehn Uhr (und) fünfzehn Minuten* one fifteen p.m.

3 Prepositions of Time (*Temporale Präpositionen*)

- examples** *Wann spielt ihr denn wieder Fußball?*
Am Samstag.
Am Vormittag oder am Nachmittag?

When answering a question of when, *am* precedes days and general times of day. (Exception: “at night” is expressed as *in der Nacht*.)

- examples** *Wann fängt die Party an?*
Um sieben Uhr.

Clock time takes *um* before the specific time.

- example** *Sprechstunde ist von Montag bis Donnerstag, von acht Uhr dreißig bis sechzehn Uhr dreißig.*

When indicating a span of time, *von* marks the beginning and *bis* notes the end..

When are you all playing football again?
 On Saturday.
 In the morning or in the afternoon?

4 Verb Conjugation (Verb: Konjugation) III

- example** *Robert arbeitet den ganzen Tag, am Abend sieht er gern fern.*

		<i>arbeit-en</i>	<i>fernseh-en</i>
singular	<i>ich</i>	<i>arbeit-e</i>	<i>sehe fern</i>
	<i>du</i>	<i>arbeitest</i>	<i>siehst fern</i>
	<i>er/sie</i>	<i>arbeitet</i>	<i>sieht fern</i>
plural	<i>wir</i>	<i>arbeiten</i>	<i>sehen fern</i>
	<i>ihr</i>	<i>arbeitet</i>	<i>seht fern</i>
	<i>sie/Sie</i>	<i>arbeiten</i>	<i>sehen fern</i>

verb with
vowel change

In Chapter 1, you saw that verbs whose stems end in *-t* or *-d* need an *-e* before the *du (-st)*, *er/sie (-t)* and *ihr (-t)* endings in order to make them pronounceable.

Verbs with an *-e* in the stem that changes will either change to an *-i* if the vowel is short (as in *sprechen*, *du sprichst*, *er/sie spricht*) or an *-ie* if the vowel is long (like *sehen* above).

5**Verb Position in the main clause (*Verb: Position im Hauptsatz*)**

examples

*Ich
Am Samstag**habe
habe**am Samstag
ich**Zeit.
Zeit.*I have time on Saturday.
On Saturday, I have time.**2
verb**

Whereas English needs the subject to come before the verb in order to make sense, German does not. In fact, what German needs to create meaning is that the conjugated verb be in second position. This functions as the anchor for the rest of the sentence.

In English, in order to begin a sentence with something other than the subject, we set the other element off with a comma. This **does not** happen in German. A sentence can begin with pretty much any element, as long as the second element is the conjugated verb. There is **no comma** setting the beginning element off.

6**Expressing likes/dislikes: *Wie findest du ...?***

examples

*Ich finde Anja sympathisch.
Ich finde die Fotos schön.*I find Anja to be likable. (I think Anja is likable.)
I find the pictures to be pretty. (I think they're pretty.)*Wie findest du Anja?
Wie findest du die Fotos?*How do you find Anja (to be)? (What do you think of her?)
How do you find the pictures (to be)? (What do you think of them?)

The expression *Ich finde ...* with an adjective is used to give a personal opinion of perception. In English, we tend to add the infinitive “to be” to the same construction, but this is absent in the German expression. It is synonymous with *gefallen*.

7**Communication Strategies**

example

*Ich koche gern und ich treffe gern Freunde.
– Aha.*I like to cook and I like to meet with friends.
I see. (Mmm hmm.)

The particle *aha* indicates that the speaker has heard what another person has said and acknowledges it.

examples

*Ich mache eine Party. Kommen Sie auch?
– (Ja,) gerne.*I'm having a party. Will you come, too?
Gladly. (With pleasure.)*Zwei Kilo Äpfel, bitte.
– Gern.*Two kilos of apples, please.
Certainly.

Apart from use with verbs, *gern(e)* indicates that a request will happily be fulfilled. The *-e* on the end does not change the meaning in any way; it only reflects the speaker's habit of speech.

Forms and Structures/Exercises

examples *Anton steht schon um sechs Uhr auf.*
Corinna steht erst um neun Uhr auf.

Anton is already getting up at 6 o'clock.
 Corinna only gets up at 9 o'clock.

Die Stadt ist schon 700 Jahre alt.
Die Wohnung ist neu. Sie ist erst 3 Jahre alt.

The city is already 700 years old.
 The apartment is new. It's just (only) 3 years old.

Ist es schon 7 Uhr?
Nein, es ist erst Viertel vor 7.

Is it already 7 o'clock?
 No, it's only quarter to 7.

The adverbs *schon* and *erst* indicate a relationship to the perception of time: either it is later than expected (*Ist es schon 7 Uhr?*) or it's earlier than expected (*Es ist erst Viertel vor 7*). In some cases, that rationale may be reversed, such as in the idea of getting up in the morning. In the example above, even though Anton is up earlier than expected, he is already up in contrast to Corinna, whom one assumes would be up already but she rises later than thought.

8 Translate into English.

a *Ein Kurs- und Arbeitsbuch*

Schritte international 2, bitte.

– Ja, gern. Hier, bitte.

.....

.....

.....

b *Kommst du? Es ist schon kurz vor 8.*

– Moment, ich komme.

.....

.....

c *Gehst du schon ins Bett?*

– Ja, ich finde den Film langweilig.

.....

.....

9 Translate into German.

a I work from 9 a.m. till 5 p.m. then

.....

I go shopping in the supermarket

.....

and at 9 o'clock I make dinner.

.....

Then I watch a little TV and at 11:30

.....

I go to bed.

.....

b I don't understand the exercise.

.....

– OK, here's an example.

.....

Do you understand the exercise now?

.....

– I don't know.

.....

Listening and Pronunciation

Umlauts (*Umlaute*)

As discussed in Chapter 1, there are only three vowels that can take an umlaut in German (the two dots above): <ä>, <ö>, and <ü>.

An umlaut effectively raises the vowel inside the speaker's mouth much in the way that the English man becomes men in the plural. If you say the two words out loud, you can feel that the <a> is in the back of the mouth, more toward the back, but the <e> in the plural is higher in the mouth and more toward the front, and if you extend the sound of it, you can feel it resonating just below your nose.

<ä> a-Umlaut [ɛ :]: <ä> is nearly identical to the sound of the German <e>. Compare the German Männer to the English men or the German *besser* and you will see how similar it is.

<ö> o-Umlaut [ø :]: <ö> is often problematic for English-speakers as they tend to hear an <r> on the end of it. Hence, many English-speakers refer to Goethe (which has an <ö>-sound) as „Gurta“. <ö> is in the front of the mouth and the tongue comes forward. To get a feel for where it is, wrinkle your nose, form an „oh“ with your lips, and say „eeee“ through it. It will not sound perfect, but it will show you how it feels when it is in the right place.

<ü> ü-Umlaut [y :]: <ü> is also all the way to the front of the mouth, right behind the top front teeth, and the tip of the tongue is on the back of the bottom front teeth. Again, by wrinkling the nose, forming „oooo“ (like „boo“) with the lips and saying „eeee“ through it, you will find the right place. Then, the sound of tschüs will be clearer to you.

Long and short <u>

gut • *Uhr*

Like the other vowels, one consonant or an <h> following the <u> makes it long. Multiple consonants make it short:

dumm • *dunkel*

Stress on verb prefixes

auf-stehen *Ich stehe um 6 Uhr auf.*

Notice that whether it is attached to the verb or alone at the end, separable prefixes always receive the stress.

Getting It All Down

When reviewing the separable prefixes you have learned in this chapter, you will probably make some note (such as a dot or dash) to remember that the prefix separates from the verb. It's a good idea to also write a phrase or sentence using the verb, not only to create meaningful context, but also to remember the pattern of sending the prefix all the way to the end of the phrase and then adding the stress to it there, too.

Familiarity and Understanding

Familiarity and Understanding

What time is it?

The phrases *Wie viel Uhr ist es?* and *Wie spät ist es?* are universally understood in German-speaking areas, but there are a few variants in the south, such as *Wie viel Uhr haben wir denn?/Wie spät haben wir denn?* that mean the same thing. You don't need to use them, but you need not be confused if you hear them, either.

Working Hours

The 9-to-5 schedule in the office is the traditional rule in the German-speaking countries, and much like in the United States, it is becoming ever more frequent that office staff start earlier and stay later. The midday meal is usually taken at 12 and there is often no coverage for that hour, or even 90 minutes, depending on the individual's schedule and coworkers. However, the days of the two-hour lunch break are past, and only some smaller shops still close for 2 hours at midday.

Quitting time in German is called *Feierabend* and it is common for colleagues and customers to wish *einen schönen Feierabend*.

The Value of Punctuality

Much of the Protestant work ethic has its roots in Germany and the neighboring countries, where efficiency has always been highly valued. Because *Zeit ist Geld* (time is money), being on time has also been of great importance.

Television

Germany has two national networks, ARD (also known as *das Erste*) and ZDF (*das Zweite*). There are also several regional/state networks that broadcast. Since the advent of cable television, several other networks (*Privatsender*) have emerged, offering a wide variety of programming, mostly imported (and dubbed). Among the most successful are SAT1, RTL, Pro7 and 3SAT. Arte broadcasts a large variety of cultural programming, beyond that which is the backbone of the broadcast networks' offerings. Even though CNN International and BBC International, along with CNN's affiliate n-tv and others, offer news and information around the clock, the most popular news programs are still *Tagesschau* (airing at 8:00 p.m. on ARD), followed by *heute-Journal* on ZDF (at 7:00 p.m.). It is generally accepted that most things come to a standstill in most homes when *Tagesschau* comes on. Though only 15 minutes long, it is far more in-depth in its reporting and broader in its scope than nightly news broadcasts in the U.S. and has no commercial interruption. Likewise, *heute-Journal* is only 20 minutes long. Switzerland has six national channels, two in each of its three major languages, while Austria has two.

Historical Notes

Berlin

From its establishment in the 13th century as a trading outpost, Berlin has grown to be one of the world's most interesting cities with one of the most remarkable histories. It became the capital of Prussia in the 17th century, and of the German Empire in 1871. After the Third Reich was defeated in 1945, the Allied Powers (the U.S., Great Britain, France and the Soviet Union) partitioned the capital into four zones of occupation. The German Democratic Republic named East Berlin its capital in 1949, and the Soviet sector grew more isolated from the West until, in 1961, the GDR erected the so-called "Anti-Fascist Protective Rampart", better known as the Berlin Wall, around the Western sectors to keep

its citizens from fleeing in search of better social and economic conditions. The Wall was erected quickly and brutally, separating family members and neighbors, allowing no contact between them, even to make arrangements. The many attempts to escape across or under the Wall from East to West are documented in the *Haus am Checkpoint Charlie* in Berlin; some spectacular, others utterly tragic.

The wall stood until November 9, 1989, when the GDR regime, crumbling under the pressure of political change in the Soviet Union and unrest at home, opened the border, leading to the dissolution of the GDR and the official reunification of Germany on October 3, 1990.

The government of the Federal Republic moved in 1999 from Bonn to Berlin where the *Bundestag* now sits in the building of the *Reichstag* with its new glass dome (*der Reichstagskuppel*, designed by English architect Norman Foster), which is a tourist destination with its panoramic view of the city.

Self-Evaluation

When listening, I can understand (Hören)

times of day: *Es ist neun Uhr. Es ist gleich halb sieben.*

outgoing answering machine messages: *Sie erreichen uns von Montag bis Mittwoch von 8 bis 16 Uhr ...*

short publicity announcements on the radio: *Fischwoche im KaDeWe ...*

In written texts, I can understand (Lesen)

signs and brochures with hours of operation/business: *geöffnet von Montag bis Donnerstag, 8.30 bis 16.30 Uhr*

the TV program: when a program begins, when the sports show comes on ...

notes in a personal schedule: *Freitag – 15.30 Uhr Hannes anrufen*

simple announcements in a tourist brochure or advertisement

I can produce the following oral structures (Sprechen)

give the time and ask for the time: *Wie viel Uhr ist es? – Es ist neun Uhr.*

talk about my daily routine, both during the week and on the weekend:
Ich stehe jeden Morgen um sieben Uhr auf. Um halb acht frühstücke ich ...

what I do and don't like to do: *Ich kuche gern. Ich arbeite nicht gern.*

talk about future plans: *Am Samstag fahre ich nach Mallorca.*

make plans with others: *Kommst du mit? – Ich habe keine Zeit.*

I can produce the following written forms of text (Schreiben)

a reminder note or a to-do list: *Zimmer aufräumen, Papa anrufen*

a text message (SMS) or an e-mail suggesting an activity (*ins Kino gehen, ...*)

Accusative Complements: definite article (*Akkusativ: Definiter Artikel*)

examples	singular		accusative complement		
m	<i>Wir haben</i>	<i>den Anzug</i>	<i>im Angebot.</i>	We have the suit on sale.	
n	<i>Wie findest du</i>	<i>das Fahrrad?</i>		How do you like the bike?	
f	<i>Ich habe</i>	<i>die Tasche.</i>		I have the bag.	
plural	<i>Möchten Sie</i>	<i>die Schuhe?</i>		Would you like the shoes?	

A complete sentence consists of a subject and a predicate. Sometimes, the predicate is just the conjugated verb, but most of the time, the verb requires some sort of complement, either an object of its action, or some other element that makes the thought complete. In such cases, most verbs are transitive, meaning that they require a direct object, a noun which receives the verbs action. In the examples above, you see that *haben*, *finden* and “möchten” (see next page) all require such direct objects.

Whereas in English and in many other languages, the word order of a sentence tells the listener who or what is doing the verb and who or what is the object of that action, German word order is not fixed in that manner. Instead, nouns have markers to indicate their relationship to other nouns. Like English, the subject of any verb is in the nominative case. Direct objects are in the accusative case and are called accusative complements of the verb. Nouns functioning as accusative complements only differ from nominative if they are masculine; as you see above, the definite article changes from *der* to *den*.

2

Accusative Complements: indefinite and negative articles (*Akkusativ: Indefiniter Artikel, Negativartikel*)

Indefinite article

examples	singular		accusative complement		
m	<i>Ich möchte</i>	<i>einen Anzug.</i>	I would like a suit.		
n	<i>Hast du</i>	<i>ein Fahrrad?</i>	Do you have a bike?		
f	<i>Ich nehme</i>	<i>eine Schorle.</i>	I'll have a spritzer.		
plural	<i>Ich möchte</i>	<i>Schuhe.</i>	I'd like shoes.		

Negative Article

examples	singular		accusative complement		
m	<i>Ich möchte</i>	<i>keinen Anzug.</i>	I don't want a suit.		
n	<i>Hast du</i>	<i>kein Fahrrad?</i>	Don't you have a bike?		
f	<i>Ich brauche</i>	<i>keine Tasche.</i>	I don't need a bag.		
plural	<i>Ich habe</i>	<i>keine Schuhe.</i>	I have no shoes.		

Indefinite (*ein-*) and negative (*kein-*) articles, like the definite article, change only for masculine nouns in the accusative case. Both *ein-* and *kein-* add *-en* (like the definite article *den*) for the masculine: *einen*, *keinen*.

Forms and Structures

3

Yes/No (closed) Questions: ja – nein – doch (Ja-/Nein-Fragen) II

- examples *Hast du Geld dabei?*
– Ja./Nein.
- Brauchst du das Buch nicht?*
Doch./Nein.
- Möchtest du kein Eis?*
Doch./Nein.
- Do you have money with you?
Yes./No.
- Don't you need the book?
Yes (I do)./No.
- Wouldn't you like any ice cream?
Yes (sure)./No.

The word *doch* is an affirmative answer, a yes, to a negative question (where the person asking expects a negative response).

4

Verb Conjugation (Verb: Konjugation) IV

- examples *Fährst du gern Fahrrad?*
Am Sonntag schläft Corinna gern bis zehn.
Ich möchte eine Cola.

infinitive		fahren	schlafen	„möchten“
singular	ich	fahre	schlafe	möchte
	du	fährst	schläfst	möchtest
	er/es/sie	fährt	schläft	möchte
plural	wir	fahren	schlafen	möchten
	ihr	fahrt	schlaft	möchtet
	sie/Sie	fahren	schlafen	möchten

Verbs with vowel change

In Chapter 5, we reviewed that <e> in a verb with a vowel change will become <i> if the vowel is short and <ie> if the vowel is long. There is only one other vowel that can change; if a verb with <a> in the stem changes vowels, it will change to <ä>. Again, this change will occur only in the *du-* and *er/es/sie-* forms.

The form “möchten”, meaning “would like”, is actually the subjunctive of another verb. For that reason, it takes a different set of endings. Note that the 1st and 3rd person singular forms are identical (*möchte, möchten*).

5

The Impersonal Pronoun es (Pronomen: es)

- examples *Es ist windig.*
Im Süden regnet es.
Es sind 25 Grad.
- It's windy.
It's raining in the south.
It's 25 degrees.

As a personal pronoun, *es* replaces neuter nouns. But *es* also functions as an indefinite pronoun in situations such as these above where there is no clear antecedent. Like *das* in Chapter 1, *es* as an indefinite pronoun can have both singular and plural verb forms (as in *es sind 25 Grad*).

6 How is the weather today?

Imagine you are a tourist in Austria with a group of Americans, and you're the only one who knows any German. Summarize the weather report for them in English:

Am Morgen ist es in ganz Österreich bewölkt. Am Nachmittag regnet es im Westen, im Osten scheint schon am Mittag die Sonne. Es bleibt aber kalt. Die Temperaturen liegen zwischen 0 und 5 Grad.

**7 What are you having? Summarize in German.**

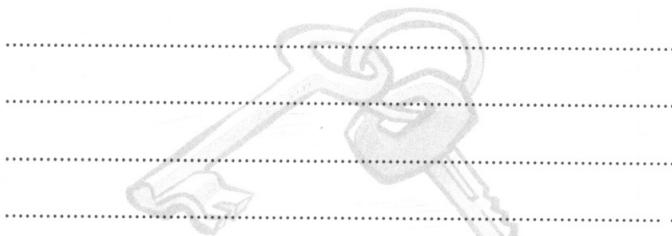

You are with your friend Jim in a restaurant in Germany, and your friend speaks no German. Summarize what your friend wants to order for the waiter:

Jim:

I'm very hungry. I think I'll have an egg salad and the chicken with fries. I'll have a beer to drink. And then I'll try an apple cake. They say it's very good in Germany, we'll see ...

You:

Mein Freund

**8 Translate into German:**

a Do you have everything with you? The key, *Hast du alles dabei?*

the train ticket, the cell phone, the money? ?

– Yes, and I have the guidebook, too.

Are we buying a bottle of water there?

b Don't we have class today?

– Yes we do!

Do we need our books?

– No, we're taking a test.

Listening and Pronunciation

Phrasing (stress and intonation)

Nina, hast du den Badeanzug? ↗

Nina, do you have your swimsuit? ↗

As we saw in Chapter 3, open yes/no questions intone upward at the end, just like in English. Keep in mind that the most important element of the sentence comes last, so the stress tends to fall on the last word.

The unstressed <e>

schlafen • *schwimmen* • *Lampen*

When the vowel <e> is unstressed, it becomes what is called a shwa, meaning it has almost no vowel quality. It is like the English “uh”, but more forward in the mouth, like “eh”, but still not an “ah”.

Getting It All Down

There is a tendency to refer to all verbs that do not conjugate the same, or that change their vowels, as irregular. Don’t fall into that trap. In fact, there are only a very few truly irregular verbs, and most aren’t nearly as irregular as *sein*. Instead, most verbs follow a handful of very regular patterns. You have already seen, for example that there are only three possible vowel changes: *e* > *i*, *e* > *ie*, and *a* > *ä*. Adding an *-e* before a *-t* (in certain forms of *arbeiten*, for example) or not doubling an *-s* of a stem when conjugating the *du*-form (such as in *essen – du isst*) is also very predictable. As you review your verbs, look for these patterns and repeat them out loud frequently. Since they are musical, it helps to hear the sound pattern over and over.

Familiarity and Understanding

Speaking of weather ...

The standard statement of temperature, as you have learned is *Es sind ... Grad*. Be aware that people also say *Es ist ... Grad*/*Wir haben ... Grad*, and in the south, *Es hat ... Grad*.

The climate in central Europe, while still milder than in many regions of North America, is growing warmer. In recent years, window air conditioning units have been readily available and sell well now that summer temperatures regularly climb over 27 degrees Celsius (80° F), the traditional level for *Hitzefrei*, the dismissal of elementary schools on account of excessive heat.

Northern Germany, bordered by two seas, has a coastal climate, and winters tend to be milder than in the mountainous south shared with Austria and Switzerland. Warming in the mountains is causing problems for the ski tourism industry as well as for freshwater supplies in lower altitudes. Glaciers are melting at an accelerated rate, and snows do not replenish enough.

Vereinsmeierei und Schrebergärten

Since most Germans do not own single-family homes, many people join clubs (*Vereine*) that own and maintain plots for gardening. There are *Vereine* for many purposes, organized and governed under regulations set down in federal and regional codes, and the saying goes that wherever three Germans are gathered together, there is a *Verein*. Many non-Germans joke about this almost obsessive tendency to organize and administrate even gatherings for social and recreational purposes.

Gardening clubs oversee so-called *Kleingärten* or *Schrebergärten*, named for the 19th century Leipzig physician who championed their establishment to promote better nutrition, more time outdoors in the fresh air and to keep people from other pursuits. In addition to these positive effects, *Schrebergärten* also allowed many people to avoid starvation after the Second World War. In the former GDR, such hobby gardens came to be known as *Datschen*, taken from the Russian tradition of the dacha, providing city dwellers with green space, fresh air and fresh food and flowers.

To this day, gardening remains popular all over the German-speaking areas of Europe. According to the *Bundesverband deutscher Gartenfreunde e.V.* (The Federal Alliance of German Garden Friends, a registered Verein) there are over 15,000 *Gartenvereine* in Germany alone overseeing over a million *Kleingärten* in Germany alone. In Austria, there are another 36,500 *Kleingärten*, and in Switzerland has over 25,000 so-called *Familiengärtner* registered.

Life after Feierabend: When to shop?

Until recently, when someone left work at 5 p.m., they had to rush to do their grocery shopping for the evening and next day, and on Saturdays, shops were open till 1 p.m. except for one Saturday per month, known as *langer Samstag*. This is no longer the case, however; most shops are open till 8 p.m. on weeknights (good for those whose *Feierabend* does not come at 5) and till at least 4 p.m. and even until 8 p.m. every Saturday. In larger cities, airports offer public shopping until late evening.

Historical Notes

National Holidays

Founded in 1291 when three cantons broke from the Holy Roman Empire, Switzerland has the longest history and tradition on which to base its national holiday. Still, 600 years is a long time to keep an exact date straight, so in 1889, the Federal Government fixed August 1st as the national holiday.

Austria's national holiday is October 26th, celebrating the establishment of the new constitution on the day after the Allied powers withdrew their occupation forces from Austria (in 1955), following ten years of occupation and de-Nazification.

With its more complicated recent history, October 3rd became the German national holiday (*Tag der deutschen Einheit* or Day of German Unity) in 1990, one year to the day after the Eastern *Bundesländer* joined the Federal Republic.

Self-Evaluation

When listening, I can understand (Hören)

the weather forecast on the radio: *Stuttgart: bewölkt bei 10 Grad ...*
simple dialogues on everyday life

In written texts, I can understand (Lesen)

short e-mail messages: *Meine Freunde/Meine neue Wohnung ...*
personal ads: *Brieffreunde gesucht! Bitte schreibt mir.*
a weather forecast on the internet or in the newspaper: *Im Norden und Westen scheint schon heute die Sonne, im Süden und Osten regnet es noch.*
simple news articles in the press (*Freizeit-Terror*)
an invitation to a party

I can produce the following oral structures (Sprechen)

talk about my personal preferences: *mein Lieblingsbuch/Lieblingsfilm ist ...*
talk about a simple statistics: *Die Reiseziele der Deutschen ...*
talk about the weather and the seasons: *Das Wetter ist schön. Die Sonne scheint.
Im Sommer haben wir ca. 25 Grad.*
answer affirmatively or negatively: *Ja. Nein. Doch.*
talk about my free-time activities and ask others about theirs: *Was sind deine Hobbys? – Ich mache gern Sport./Meine Hobbys sind ...*
form hypotheses: *Das ist bestimmt .../Ich glaube ...*

I can produce the following written forms of text (Schreiben)

a personal ad: *Hello! Ich heiße ... Ich suche Brieffreunde ...*
a short postcard: *Hello ..., wir sind in Griechenland. Das Wetter ist ...*
a short e-mail

Modal verbs: *können* and *wollen* (Modalverben)

examples *Er kann sehr gut Tango tanzen.*
Sie will einen Tanzkurs machen.

He can dance the tango very well.
 She wants to take a dance class.

Modal verbs add another dimension to a verb. In the case of *können*, it adds the notion of having the ability to do something. With *wollen*, it is a matter of wanting to do something.

a *können*

The primary function of *können* is to express ability:

examples ● *Kannst du einen Handstand machen?* Can you do a handstand?
 ■ *Nein, aber ich kann jonglieren.* No, but I can juggle.

Beyond ability, *können* also expresses a degree of politeness:

Kann ich etwas fragen? Can I ask something?

b *wollen*

The modal verb *wollen* indicates a definite desire to do something:

examples *Was wollen Sie machen?* What do you want to do?
Ich will jetzt nach Hause gehen. I want to go home now.

Note: the singular form *will* is NOT identical to the English verb form. The verb *wollen* does not indicate future tense! Using *wollen* to ask for something is not as polite as using “*möchten*”:

Ich will möchte eine Cola. I want would like a cola.

infinitive		<i>können</i>	<i>wollen</i>
singular	<i>ich</i>	<i>kann</i>	<i>will</i>
	<i>du</i>	<i>kannst</i>	<i>willst</i>
	<i>er/es/sie</i>	<i>kann</i>	<i>will</i>
plural	<i>wir</i>	<i>können</i>	<i>wollen</i>
	<i>ihr</i>	<i>könnt</i>	<i>wollt</i>
	<i>sie/Sie</i>	<i>können</i>	<i>wollen</i>

There are two important patterns to note when conjugating modal verbs:

- (1) the vowel in the singular forms is different than the infinitive; and
- (2) the 1st and 3rd person singular forms are identical and have no ending.

Modal verbs are conjugated and are in second position of a clause (or in first position in a yes/no question). The other verb is in the infinitive form at the end of the phrase in the final position.

examples	<i>Er kann sehr gut Tango tanzen.</i>	<i>Sie will einen Tanzkurs machen.</i>	
	2 modal verb		final infinitive

Sometimes an infinitive can be omitted if the context is clear, as is often the case with *möchten*, but with *können* as well.

Können Sie Deutsch (sprechen/verstehen)?

Can you speak German? (also assumes writing and understanding a language)

Ich möchte ein Fahrrad (haben).

I would like (to have) a bike.

2 Past tense: das Perfekt

a The Perfekt with haben

examples Was habt ihr heute im Unterricht gemacht? – Wir haben viel gesprochen.

What did you do in class today?
– We spoke a lot.

Habt ihr gestern Tennis gespielt?

Did you play tennis yesterday?

Ich habe früher nur Hardrock gehört.

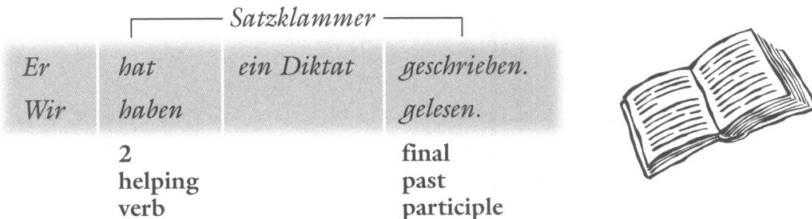

Earlier (in the past), I only listened to hard rock.

Letztes Jahr habe ich einen Sprachkurs beim Goethe-Institut in Deutschland gemacht.

Last year, I took a language class in Germany at the Goethe Institute.

Das Perfekt is the verb tense used when speaking to discuss most activities in the past. It is comprised of a **helping, or auxiliary verb**, usually *haben*, which is conjugated, and a **past participle** of the verb which is in final position. The practice of having the conjugated verb in second position, and any other part of the verb, be it a prefix, an infinitive, or a past participle, in the final position, is very common in German and the construction is known as a *Satzklammer* or verbal bracket.

b The Perfekt with sein

examples Corinna ist zu Anton gekommen.
Dann sind sie zur Tanzschule gefahren.

Corinna came to Anton's house.
Then, they went to the dance school.

About 90 % of all German verbs have *haben* as their helping verb in the Perfekt. The rest use *sein*. They are primarily verbs that involve change of location (some kind of movement from one place to another) and they never take an accusative complement (direct object). Verbs that you are familiar with include *kommen, gehen* and *fahren*.

c The Past Participle (das Partizip Perfekt oder Partizip II)

examples Habt ihr Fußball gespielt?
– Nein, wir sind ins Restaurant gegangen.

Like English, where participles end in -ed or -(e)n, German participles end in -t or in (e)n. (Note, though, that English participles and German participles are not used in the same way.) German participles are formed by adding the correct ending to the verb stem, changing the vowel if necessary, and usually adding the prefix *ge*:

ge ... t

spielen → *ge spel t*
lernen → *ge lern t*
 hören → *ge hör t*

ge ... en

lesen → *ge les en*
fahren → *ge fahr en*
kommen → *ge komm en*

ge ... (vowel change) ... en

sprechen → *ge sproch en*
schreiben → *ge schrieb en*
finden → *ge fund en*

When you learn verbs, be sure to learn them with their participles.
If they take *sein* as their helping verb, memorize that, too:

lesen, hat gelesen
arbeiten, hat gearbeitet

gehen, ist gegangen
schlafen, hat geschlafen

3 Translate into English:

- Wie gut können Sie denn Deutsch?* ?
- Können Sie zum Beispiel deutsche Radiosendungen verstehen? Und können Sie deutsche Zeitschriften lesen?* ?
- *Nein, aber ich kann im Chat ein bisschen Deutsch sprechen und ich kann auf Deutsch singen.*
- *Gut, wollen Sie morgen anfangen?* ?

4 Translate into German:

- a Ellen wants to take a computer class.
I know. Did she find something yet? ?
– No, not yet.
Did she already ask Eric? He knows a lot of people.
- b What did you all do on Saturday? ?
– On Saturday? We went for a walk, saw a movie, and in the evening Henry and Betty came over and we played Uno.

Listening and Pronunciation

Pronunciation of *sch*, *sp*, *st*

Schule • *Maschine*

The letters *sch* correspond to the English “sh”.

Spanien • *spielen* • *Gespräch*

Straße • *studieren* • *verstehen*

When *<sp>* or *<st>* appear at the beginning of a syllable, the sound is a combination of „sh“ and the *-t* or *-p*.

Getting It All Down

In this lesson, you have been introduced to *das Perfekt*, and the most systematic way to learn the past participles is to learn them as a unit together with the infinitive and the third-person singular form of the verb. Look for verbs that show the same changes, and review them together.

Taking or Making? Having or Taking?

Note that in German, one does not “take” a class. Rather, one makes a class (*Ich mache einen Tanzkurs*). In Chapter 6, by contrast, Germans did not “have” a dish in a restaurant; rather, in German one takes a dish. (*Ich nehme das Hähnchen mit Pommes*.) Language is not mathematics, and one of the most cumbersome, but most profitable, aspects of learning a new one is to recognize what phrases are idiomatic and thus not given to direct word-for-word translation. Think of it as an adult version of “Amelia Bedelia.”

More on Verbs

If you look in a German-language or German-English dictionary, you will see that verbs are listed in their infinitive form, and then the 3rd person singular (*er/es/sie*) form is often given, followed by the past participle. There is a reason for this. Though it might still seem random to you at this stage, the patterns verbs follow in forming their tenses are indicated by those forms and the vowel changes in them. Be sure to note those forms when learning new verbs.

“Did” or “have done”?

Because *das Perfekt* resembles our compound past tense in English, there is a tendency to assume that the *Perfekt* translates to our compound tense. This is not the case. If you look over the translations in the examples throughout section 2 in this chapter, you will not find a compound English past tense. This is yet another case where it is important to remember that language is not mathematics and one word in one language does not absolutely exist as one word in another language. In the case of the *Perfekt*, all you need to know is if you are talking about something that happened in the past, you use the *Perfekt*.

Familiarity and Understanding

Volkshochschulen – Continuing Education

There are over 1000 so-called *Volkshochschulen* or adult education schools in Germany. They are subsidized by the Federal government but under local control. Much like continuing education programs at U.S. high schools and community colleges, there is a broad range of courses offered in languages, cooking, tango or salsa, vocational training, arts and culture, along with cultural excursions and even group vacations. Though they are not degree-granting, some certificates, such as the *Zertifikat Deutsch* for foreigners, can be earned at a *Volkshochschule*.

German as a Foreign Language

Though German has been declining in popularity among high-school students in the United States, it is nevertheless a very useful language for scientific and commercial purposes.

The German-American Chamber of Commerce operates three offices across the United States to facilitate US-German partnerships, trade and joint ventures. Over 1,800 companies in the United States are owned by German parents, while over 1800 U.S. firms operate in Germany, employing over 800,000 people. The DAAD (*Deutscher Akademischer Austauschdienst* or German Academic Exchange Service) provides financial and other support to over 50,000 individuals each year either to come from the U.S. to study in Germany or vice versa.

Beyond that, Germany, Austria, Switzerland and Liechtenstein comprise the second-largest source for optics and photonics products in the world after North America. Of the over five million cars manufactured in Germany each year, over 70 % are exported. Germany and Switzerland are also major world powers when it comes to chemical production and pharmaceuticals. Though many Germans, Swiss and Austrians do speak English, the ability to understand the culture in which they live as academic and trade partners is a vital advantage to anyone working with people from these countries.

German: The National Language of The United States?

Was German almost the official language of the United States of America?

This tale has circulated for years, and because large sections of the United States were settled by German immigrants and still more were populated by German-speakers, it seems to have credence. In fact, though, the idea of making German the official language of the United States was never considered or proposed. In 1795, a group of German-Americans in Virginia petitioned Congress for the printing of 3,000 sets of laws in German for distribution among new immigrants from those areas of Europe, but this request was never even voted on, and a motion to table it for later discussion was defeated by one vote. Eventually, the legend grew that a debate to change the official language altogether was defeated by only one vote, but it was never even a thought.

There are still communities of German-speakers in North America, primarily within Amish and Mennonite communities, whose dialects still resemble those spoken by their ancestors who settled in the New World over a hundred years ago.

Self-Evaluation

When listening, I can understand (Hören)

information a person gives about him-/herself: *Ich heiße ...; Mein Name ist .../ Ich bin ...*

a person's origins: *Ich komme aus ...*

the languages someone speaks: *Ich spreche Türkisch. Ich kann Polnisch.*

In written texts, I can understand (Lesen)

short magazine articles: *Sternzeichen/Freizeitstress/Lerntipps/...*

announcements or ads for classes or vacation trips

I can produce the following oral structures (Sprechen)

explain what I want to do or plan to do in the future: *Ich will einen Tanzkurs machen.*

talk about what I can do well: *Ich kann sehr gut reiten.*

make suggestions and respond to others' suggestions: *Wollen wir zusammen Fahrrad fahren? – Ja, gern./Nein.*

talk about what I have done in the past few days: *Gestern habe ich Spanisch gelernt.*

I can produce the following written forms of text (Schreiben)

a simple e-mail or short post card about a non-credit class

a diary or journal entry about what I have done in the course of the day

Answers to the XXL Exercises

Answers to the XXL Exercises

Chapter 1

- 7 **a** Is Mr. Thoma there, please? – Sorry, Mr. Thoma is not here. **b** Where is Richard from? (Where does Richard come from?) From California? – Yes, that's right. **c** This is my colleague, Lucie. – Oh yes! Hello, Lucie.
- 8 **a** Hallo, ich bin David. **b** Guten Tag, ich bin Stefan Fischer. **c** Guten Nachmittag/Guten Tag/Guten Abend, mein Name ist Delgado, Rosa Delgado.
- 9 **a** Entschuldigung, wie heißen Sie? wie ist Ihr Name? – Abramov, Julie Abramov. **b** Woher sind/kommen Sie? – Ich bin/komme aus Iowa, aus dem Mittelwesten. **c** Und du, Joan? Woher kommst du? – Aus Minnesota, aus St. Paul. **d** Welche Sprachen sprechen Sie? – Englisch, Spanisch und ein bisschen Französisch.

Chapter 2

- 9 **a** Hallo, Jim. Wie geht's? – Gut, und dir? **b** Wo wohnen Gwen und Bob? – Sie wohnen in Los Angeles in der Mulholland Drive. **c** Ich bin in Iowa geboren, aber ich wohne schon lange in Florida. **d** Meine Familie ist aus Kanada, aber meine Eltern und Geschwister wohnen in Oregon.
- 10 **a** Herr Rogers, das ist Frau Beasley, meine Kollegin aus New York. – Ah, guten Tag, Frau Beasley. **b** Jennifer, bist du verheiratet? – Nein, ich bin geschieden. **c** Wie alt sind deine Kinder? – Mein Sohn ist zehn und meine Tochter ist zwölf.

Chapter 3

- 10 **a** What does a pound/500 grams of beef cost? – 3 € 99. **b** Do you like to eat fish? – Yes, very much. **c** Would you like anything else? – No, thank you. That's all.
- 11 **a** Das ist keine Tomate, oder? – Nein, das ist ein Kiwi. **b** Wie heißt „basket“ auf Deutsch? – „Basket“ heißt auf Deutsch „Korb“. **c** Hast du/Haben Sie Bananen? – Nein, ich habe keine Bananen, aber ich habe Orangen. **d** Bananen kosten 4,50 €. – Wie bitte? Wie viel?

Chapter 4

- 9 **a** I'm looking for a vacation apartment. – How much would you like to pay? **b** How do you like London? – The city is beautiful, but a little expensive. **c** Say, is there a toilet here? – Yes, it's there.
- 10 **a** Wo ist das Wörterbuch? – Es ist hier. **b** Wie gefällt dir/Ihnen das Hotel? – Es ist schön, aber die Zimmer sind sehr klein. **c** Schmeckt dir/Ihnen der Wein? Er ist ein Riesling. – Er schmeckt mir sehr gut.

Chapter 5

- 8 **a** One course- and workbook "Schritte International 2", please. – Yes, gladly. Here you are. **b** Are you coming? It's already just before 8. – Just a sec, I'm coming. **c** Are you going to bed already? – Yes, I think the movie's boring.
- 9 **a** Ich arbeite von 9 bis 17 Uhr, dann kaufe ich im Supermarkt ein und um 21 Uhr mache ich das Abendessen. Dann sehe ich ein bisschen fern und um 23.30 Uhr gehe ich ins Bett. **b** Ich verstehe die Übung nicht. – Okay, hier ist ein Beispiel. – Verstehst du die Übung jetzt? – Ich weiß nicht.

Chapter 6

- 6 Possible response:
It will be cloudy all over Austria in the morning. It's going to rain in the west in the afternoon and the sun will come out by noon in the east. It's going to be cold, though, temps will be between 0 and 5 (32 and 41).
- 7 Possible response:
Mein Freund ist sehr hungrig und möchte den Eiersalat und das Hähnchen mit Pommes. Zum Trinken nimmt er ein Bier, und dann probiert er einen Apfelkuchen. Man sagt, er schmeckt sehr gut in Deutschland.
- 8 **a** Hast du alles dabei? Den Schlüssel, die Fahrkarte, das Handy, das Geld? – Ja, und ich habe auch den Reiseführer. – Kaufen wir noch eine Flasche Wasser dort? **b** Haben wir morgen keinen Unterricht? – Doch! – Brauchen wir unsere Bücher? – Nein, wir schreiben einen Test.

Chapter 7

- 3 How well do you speak German? For example, can you understand German radio shows? And can you read German magazines? – No, but I can speak a little German in an online chat and I can sing in German. – Good, do you want to start tomorrow?
- 4 **a** Ellen will einen Computerkurs machen. – Ich weiß. Hat sie schon etwas gefunden? – Nein, noch nicht. – Hat sie Eric schon gefragt? Er kennt viele Leute. **b** Was habt ihr am Samstag gemacht? – Am Samstag? Wir sind spazieren gegangen, haben einen Film gesehen und am Abend sind Henry und Betty gekommen und wir haben Uno gespielt.
